CALENDAR 1944

FIRST TRIMESTER

January 3-4, (Monday and Tuesday) ..... Re-Examinations

January 3, (Monday) ..... First-Year Registration

January 4-5, (Tuesday and Wednesday), Upper Classes Registration

January 6, Thursday, 9 a.m. ..... Classes Begin

March 22, Wednesday, 5 p.m. ..... Classes end for First Trimester Examinations in Completed Courses

SECOND TRIMESTER

March 27, Monday, 9 a.m. ..... Second Trimester Begins

June 10, Saturday, 1 p.m. ..... Classes End for Second Trimester Examinations in Completed Courses

THIRD TRIMESTER

June 19, Monday, 9 a.m. ..... Third Trimester Begins

September 2, Saturday, 1 p.m. ..... Classes End for Third Trimester

September 4-9 ..... Final Examinations

September 11, Monday ..... Commencement Day

CALENDAR 1944-1945

FIRST TRIMESTER

September 27-28, (Wednesday and Thursday).....Re-Examinations

September 27-28, (Wednesday and Thursday) .....First-Year Registration

September 29-30, (Friday and Saturday) .....Upper Classes Registration

October 2, Monday, 9 a.m. .....Classes Begin

November 30-December 1-2 .....Thanksgiving Recess

December 20, Wednesday 5 p,m. .....Classes End for First Trimester Examinations in Completed Courses

SECOND TRIMESTER

December 28, Thursday, 9 a.m.....Classes Begin for Second Trimester

March 14, Wednesday, 5 p.m.....Classes End for Second Trimester Examinations in Completed Courses

THIRD TRIMESTER

March 19, Monday, 9 a.m.....Classes Begin for Third Trimester

June 2, Saturday, 1 p.m. .....Classes End for Third Trimester

June 4-9 .....Final Examinations

June 11, Monday .....Commencement Day

REGENTS

UNIVERSITY SYSTEM OF GEORGIA

STATE CAPITOL, ATLANTA

DISTRICT	*REGENT*	*ADDRESS*
State at Large	MARION SMITH January 1, 1943-January 1, 1946	Atlanta
State at Large	CASON J. CALLAWAY January 1, 1943-January 1, 1950	Hamilton
State at Large	FRANK M. SPRATLIN January 1, 1943-January 1, 1946	Atlanta
State at Large	EARL B. BRASWELL January 1, 1943-January 1, 1949	Athens
State at Large	POPE F. BROCK January 1, 1943-January 1, 1948	Atlanta
First	J. L. RENFROE January 1, 1943-January 1, 1948	Statesboro
Second	EDWARD R. JERGER January 1, 1943-January 1, 1947	Thomasville
Third	GEORGE C. WOODRUFF January 1, 1944-January 1, 1951	Columbus
Fourth	C. J. SMITH January 1, 1943-January 1, 1949	Newnan
Fifth	RUTHERFORD L. ELLIS January 1, 1943-January 1, 1947	Atlanta
Sixth	MILLER R. BELL January 1, 1943-January 1, 1950	Milledgeville
Seventh	ROY N. EMMET, Sr. January 1, 1943-January 1, 1945	Cedartown
Eighth	S. PRICE GILBERT January 1, 1943-January 1, 1950	Sea Island
Ninth	SANDY BEAVER January 1, 1943-January 1, 1945	Gainesville
Tenth	WILLIAM S. MORRIS January 1, 1944-January 1, 1951	Augusta

---

OFFICERS OF THE REGENTS

Chairman ..... Marion Smith
Vice-Chairman ..... Sandy Beaver
Chancellor ..... S. V. Sanford
Secretary ..... L. R. Siebert
Treasurer ..... W. Wilson Noyes

FACULTY

George Lombard Kelly, B.A., B.S. Med., M.D., Dean

EMERITUS PROFESSORS — Office Address

William Henry Goodrich, B.A. (Ga. '93),
M.D. (Ga. '97) ..... University Hospital
Professor Emeritus of Clinical Gynecology

Henry Middleton Michel, M.D. (Ga. '98) ..... University Hospital
Professor Emeritus of Clinical Orthopedic Surgery

William Anthony Mulherin, B.A. (Spring Hill '91),
M.A. (Spring Hill '00), M.D. (Harvard '01),
D.Sc (Ga. '27) ..... 1211 Greene Street
Professor Emeritus of Clinical Pediatrics

PROFESSORS

Lane Harris Allen, B.S. (Ga. '30), M.S. (Ga. '32),
Ph. D. (Georgetown '35), M.D. (Ga. '39) ..... School of Medecine
Professor of Gross Anatomy

Claude McKinley Burpee, B.S. Med. (Ga. '20),
M.D. (Ga. '22) ..... University Hospital
Professor of Pediatrics

Hervey Milton Cleckley, B.S. (Ga. '24),
B.A. (Oxford '26), M.D. (Ga. '29) ..... University Hospital
Professor of Neuropsychiatry

*Robert Benjamin Greenblatt, B.A. McGill '28),
M.D. (McGill '32) ..... School of Medicine
Professor of Experimental Medicine

William Ferguson Hamilton, B.A. (Pomona '17),
Ph.D. (Cal. '21) ..... School of Medicine
Professor of Physiology

George Lombard Kelly, B.A. (Ga. '11),
B.S.Med. (Ga '22), M.D. (Ga. '24) ..... School of Medicine
Professor of Gross Anatomy

Joseph Krafka, Jr., B.A. (Lake Forest '14), M.A. (Lake Forest '15),
Ph.D. (Ill. '19), M.D. (Ga. '33) ..... School of Medicine
Professor of Microscopic Anatomy

**On leave in Armed Forces*

ROBERT CARLISLE MAJOR, A.B. (Wofford '28),
M.D. (Hopkins '32) ..... Wilhenford Hospital
Professor of Thoracic Surgery

CARLTON HOWARD MARYOTT, B.A. (Brown '04),
Ph.D. (Yale '11) ..... School of Medicine
Professor of Chemistery

EDGAR RUDOLPH PUND, B.A. (Ga. '14),
M.D. (Ga. '18) ..... School of Medicine
Professor of Pathology

JOHN ROBERT RINKER, B.S. Med. (Kans. '27),
M.D. (Kans. '29) ..... School of Medicine
Professor of Urology

WILFORD ARLESS RISTEEN, B.A. (Carroll College '26),
M.D. (Wisc. '30) ..... University Hospital
Professor of Neurologic Surgery

EVERETT S. SANDERSON, B.S. (Mass. State '16), M.S. (Yale '21),
Ph.D. (Yale '22), M.D. (Wash. '34) ..... School of Medicine
Professor of Bacteriology and Public Health

*JOHN HAYS SHERMAN, B.S.Med. (Ga. '20),
M.D. (Ga. '23) ..... University Hospital
Professor of Surgery

VIRGIL PRESTON SYDENSTRICKER, B.A. (W. & L. '10),
M.A. (W. & L. '11), M.D. (Hopkins '15) ..... University Hospital
Professor of Medicine

LUCIUS NEWTON TODD, M.D. (Ga. '15) ..... Wilehnford Hospital
Professor of Tuberculosis

RICHARD TORPIN, A.B. (Neb. Wesleyan '13),
S.B. (Chicago '15), M.D. (Rush Med. '17) ..... University Hospital
Professor of Obstetrics and Gynecology

PERRY PAUL VOLPITTO, B.S. (Wash. & Jefferson '28),
M.D. (Western Reserve '33) ..... University Hospital
Professor of Anesthesiology

ROBERT ARTHUR WOODBURY, B.S. (Kan. '24),
M.S. (Kan. '28), Ph.D. (Kan. '31),
M.D. (Chicago '34) ..... School of Medicine
Professor of Pharmacology

**On leave in Armed Forces*

CLINICAL PROFESSORS

William Whatley Battey, M.A. (Belmont Abbey '00), M.D. (Ga. '04) ..... 561 Telfair Street
Professor of Clinical Surgery

Guy Talmadge Bernard, M.D. (Ga. '07) ..... 204 Thirteenth Street
Professor of Clinical Dermatology and Oncology

Charles Iverson Bryans, M.D. (Ga. '04) ..... 967 Meigs Street
Professor of Clinical Ophthalmology and Oto-Laryngology

Ralph Hill Chaney, B.A. (Oberlin '09), M.A. (Obelin '13), M.D. (Pa. '14) ..... 1001 Greene Street
Professor of Clinical Surgery

Warren Coleman, A.B. (Transylvania '88), A.M. Hon. (Transylvania '99), M.D. (N.Y. '91) ..... University Hospital
Professor of Clinical Medicine

William Johnston Cranston, M.D. (Ga. '08) ..... 1345 Greene Street
Professor of Clinical Medicine

Lysander Palmer Holmes, M.D. (Vanderbilt '12) ..... S. F. C. Building
Professor of Clinical Roentgenology

Andrew Jones Kilpatrick, M.D. (Ga. '96) ..... 407 Seventh Street
Profesor of Clinical Obstetrics

Eugene Edmund Murphey, M. D. (Ga. '98) ..... 432 Telfair Street
Professor of Clinical Medicine and Lecturer in Preventive Medicine

Robert Lewis Rhodes, B.A. (Emory '06), M.D. (Hopkins '10) ..... S. F. C. Building
Professor of Clinical Surgery

Joseph Righton Robertson, M.D. (Md. '10) ..... 1345 Greene Street
Professor Clinical Urology

*Everard Ansley Wilcox, B.S. (Davidson '07), M.A. (Davidson '09), M.D. (Ga. '10) ..... 1345 Greene Street
Professor of Clinical Gynecology

Peter Burum Wright, M.D. (Ga. '20) ..... University Hospital
Professor of Clinical Orthopedic Surgery

ASSOCIATE PROFESSORS

Benedict Ernest Abrue, B.S. (Cal. '35), M.S. (Cal. '37), Ph.D. (Cal. '39) ..... School of Medicine
Associate Professor of Pharmacology

**On leave in Armed Forces*

STEWART HART AUERBACH, A.B. (Ala. '31),
M.D. (Ga. '34) ..... School of Medicine
Associate Professor of Pathology

ALFRED POYNEER BRIGGS, B.S. (Col. '12),
M.D. (Wash. '22) ..... School of Medicine
Associate Professor of Biochemistry and Medicine

ROBERT BARTON DIENST, B. A. (Baylor '25), M.A.
(Baylor '26), Ph.D. (Chicago '33) ..... School of Medicine
Associate Professor of Bacteriology and Public Health

PHILIP DOW, B.S. (Mich. '27),
Ph.D. (Yale '35) ..... School of Medicine
Associate Professor of Physiology

HARRY TAYLOR HARPER, JR,. M.D. (Emory '33) ..... S. F. C. Building
Associate Professor of Medicine

*CHARLES GOODRICH HENRY, B.A. (Ga. '23),
M.D. (Ga. '28) ..... University Hospital
Associate Professor of Surgery

GARLAND FRANK JONES, JR., B.S. (Union '34),
M.S. (Ohio '40), M.D. (Tenn. '37) ..... University Hospital
Associate Professor of Surgery

*MEINHARD ROBINOW, M.D. (Hamburg '34) ..... School of Medicine
Associate Professor of Pediatrics

ASSOCIATE CLINICAL PROFESSORS

JAMES HARVEY BUTLER, M.D. (Ga. '14) ..... S. F. C. Building
Associate Professor of Clinical Medicine

WALTER EUGENE MATTHEWS, M.D. (Ga. '30) ..... S. F. C. Building
Associate Professor of Clinical Ophthalmology and Oto-Laryngology

JULES VICTOR ROULE, JR., M.D. (Ga. '26) ..... S. F. C. Building
Associate Professor of Clinical Ophthalmology and Oto-Laryngology

JOHN WILLIAM THURMOND, M.D. (Ga. '26) ..... 407 Seventh Street
Associate Professor of Clinical Obstetrics

ANDREW AUGUSTUS WALDEN, M.D. (Medico-Chir.,
Phila. '02) ..... 508 Carolina Avenue
Associate Professor of Clinical Medicine

GEORGE WASHINGTON WRIGHT, B.S. (Ga. '22),
M.D. (Ga. '26) ..... 1345 Greene Street
Associate Professor of Clinical Surgery

**On leave in Armed Forces*

ASSISTANT PROFESSORS

William Fielder Alexander, B.S. (Knox '33),
M.S. (St. Louis '37), Ph.D. (St. Louis '39) .....School of Medicine
Assistant Professor of Gross Anatomy

John Burman Bowen, M.D. (Ga. '39) .....University Hospital
Assistant Professor of Surgery

Lester Llewellyn Bowles, A.B. (Franklin '34),
M.D. (Indiana '38) .....School of Medicine
Assistant Professor of Microscopic Anatomy

Encil Morton Bradley, B.A. (Wisc. '33),
Ph. D. (Rochester '38) .....School of Medicine
Assistant Professor of Gross Anatomy

James Fred Denton, Jr., B.S. (Ga. '35), M.S. (Ga. '38),
Ph.D. (Rice Inst. '41) .....School of Medicine
Assistant Professor of Bacteriology and Public Health

Nathan Massey DeVaughn, M.D. (Ga. '39).....School of Medicine
Assistant Professor of Medicine

Walter Knowlton Hall, B.S. (Oregon St. Coll. '31),
M.S. (Oregon St. Coll. '38), Ph.D. (Iowa '36).....School of Medicine
Assistant Professor Biochemistry

Charles William Hock, M.D. (Duke '41) .....School of Medicine
Assistant Professor of Medicine

Frank Lansing Lee, B.S.Med. (Ga. '19), M.D. (Ga. '21)....S.F.C. Building
Assistant Professor of Medicine

David Fielding Marsh, A.B. (W. Va. '39),
M.S. (Purdue '40), Ph.D. (Calif. '42) .....School of Medicine
Assistant Professor of Pharmacology

**Marion Winford Mathews, B.A. (Agnes Scott '34),
M.S. (Emory '35), M.D. (Ga. '40) .....University Hospital
Assistant Professor of Medicine

Henry Getzen Mealing, B.S. (Ga. '20), M.D. (Ga. '22)....S. F. C. Building
Assistant Professor of Medicine

Charles Robert Noback, B.S. (Cornell '36),
M.S. (N. Y. U. '38), Ph.D. (Minn. '42).....School of Medicine
Assistant Professor of Microscopic Anatomy

***On leave of absence for one year*

JOHN THOMAS PERSALL, JR., B.S. (Ga. '28),
M.D. (Emory '33) ..... School of Medicine
Assistant Professor of Obstetrics and Gynecology

JOHN WOOD REMINGTON, B.S. (Charleston '31), M.S. (N. Y. U. '37),
Ph.D. (N. Y. U. '39) ..... School of Medicine
Assistant Professor of Physiology

SAM ALLEN SINGAL, B.S. (Toledo '36),
M.S. (Mich. '38), Ph.D. (Mich. '40) ..... School of Medicine
Assistant Professor of Chemistry and Research Fellow in Medicine

*HENRY LOUIS SCHMIDT, JR., B.S. (Ga. '31),
M.D. (Ga. '35) ..... University Hospital
Assistant Professor of Medicine

ASSISTANT CLINICAL PROFESSORS

MONTE PRESTON AGEE, M.D. (Ga. '21) ..... S. F. C. Building
Assistant Professor of Clinical Gynecology

JOHN WILKINSON BRITTINGHAM, Ph.B. (Georgetown '22),
M.A. (Georgetown '23), M.D. (Hopkins '27) ..... 1345 Greene Street
Assistant Professor of Clinical Medicine

JAMES M. FLOOD, A.B. (Ohio Northern '32),
M.D. (Temple '35) ..... Oliver General Hospital
Assistant Professor of Clinical Dermatology

*THOMAS WRIGHT GOODWIN, B.S. (Ga. '26),
M.D. (Ga. '30) ..... 1345 Greene Street
Assistant Professor of Clinical Surgery

JOSEPH DEWEY GRAY, M.D. (Ga. '20) ..... 1345 Greene Street
Assistant Professor of Clinical Medicine

*CHARLES MCCORD KILPATRICK, M.D. (Ga. '28) ..... 1345 Greene Street
Assistant Professor of Clinical Ophthalmology and Oto-Laryngology

*J. ZEB MCDANIEL, A.B. (Davidson '27), M.D. (Ga. '32) ..... 1345 Greene Street
Assistant Professor of Clinical Urology

ROBERT CAREY MCGAHEE, B.S. Med. (Ga. '22),
M.D. (Ga. '24) ..... 1345 Greene Street
Assistant Professor of Clinical Pediatrics

*PHILIP ANTHONY MULHERIN, M.D. (Ga. '30) ..... 1211 Greene Street
Assistant Professor of Clinical Pediatrics

**On leave in Armed Forces.*

*Irvine Phinizy, B.S. (Ga. '19), M.D. (Ga. '23) .....S. F. C. Building
Assistant Professor of Clinical Medicine

Thomas Burdell Phinizy, B.S. (Ga. '23),
M.D. (Ga. '28) .....1345 Greene Street
Assistant Professor of Clinical Medicine

William H. Roberts, M.D. (Ga. '13) .....828 Greene Street
Assistant Professor of Clinical Dermatology and Oncology

Leonard Scheinman, B.S. (Columbia U. '31), M.D.
(U. of Paris '38) .....U. S. Veterans Hospital Lenwood Reservation
Assistant Professor of Clinical Neuropsychiatry

*David Romulus Thomas, Jr., B.S. (V. M. I. '26),
M. D. (Ga. '30) .....S. F. C. Building
Assistant Professor of Clinical Medicine

Charles Douglas Ward, B.S. (Ga. '15), M.D. (Ga. '20)....1345 Greene Street
Assistant Professor of Clinical Surgery

*Richard Bynum Weeks, B.S.Med.(Ga.'23),M.D.(Ga.'25)..S. F. C. Building
Assistant Professor of Clinical Surgery

ASSOCIATES

Lane Harris Allen, B.S. (Ga. '30), M.S. (Ga. '32),
Ph. D. (Georgetown '35), M.D. (Ga. '39) .....School of Medicine
Associate in Psychiatry

CLINICAL ASSOCIATES

Henry Pierce Harrell, M.D. (Ga. '20).....S. F. C. Building
Associate in Clinical Pediatrics

Francis Xavier Mulherin, B.A. (Sacred Heart '06),
M.D. (Pa. '11) .....1001 Greene Street
Associate in Clinical Pediatrics

INSTRUCTORS

Joseph Winfred Harner, Jr., B.S. (Ga. '40),
M.D. (Ga. '43) .....School of Medicine
Instructor in Pathology

Forest Hunter, B.A. (Ala. '32),
M.D. (Ohio St. U. '38) .....Quarantine Hospital
Instructor in Dermatology No. 1 Milledge Road

Aubrey Jackson Waters, B.S. (Ga. '32), M.S. (Ga. '35),
Ph.D. (Wisc. '40) .....School of Medicine
Instructor in Pathology

**On leave in Armed Forces.*

CLINICAL INSTRUCTOR

*RUBEN MAX REIFLER, Ph.D. (Ill. '26), B.S. (Ill. '35), M.D. (Ill. '37) ..... School of Medicine
Instructor in Clinical Dermatology

LECTURERS

GORDON W. CHAMBERS, L.L.B. (Ga. '23) ..... Court House
Judge City Court, Lecturer in Forensic Medicine

ARCHIE L. HAGGERTY, D.V.M. ..... 501 Greene Street
Director of Food, Milk and Meat Sanitation, Richmond County Health Department, *Field Demonstrator*

*FREEMAN C. MCCLURE, B.A. (Ga. '23), L.L.B. (Ga. '26) ..... S. F. C. Building
Lecturer in Forensic Medicine

CLINICAL ASSISTANTS

MELVIS O. CORBITT, M.D. (Ga. '32) ..... 1309 Holden Street
Assistant in Clinical Obstetrics

*FRANK N. H. HARRISON, M.D. (Ga. '38) ..... S. F. C. Building
Assistant in Clinical Obstetrics and Gynecology

*JOHN PHINIZY HITCHCOCK, M.D. (Ga. '36) ..... 561 Telfair Street
Assistant in Clinical Surgery

*JOHN EMILE HUMMEL, M.D. (Ga. '40) ..... University Hospital
Assistant in Clinical Surgery

PHYLLIS JOHNSON, A.B. (Agnes Scott '39), M.D. (Ga. '43) ..... University Hospital
Assistant in Clinical Medicine

JOHN MILTON MARTIN, A.B. (Mercer '38), M.D. (Ga. '43) .... University Hospital
Assistant in Clinical Medicine

ABRAHAM MILLER, M.D. (Basel, Switzerland '36) ..... 1345 Greene Street
Assistant in Clinical Obstetrics and Gynecology

*CHARLES MCLAUGHLIN MULHERIN, M.D. (Ga. '33) ..... 1211 Greene Street
Assistant in Clinical Obstetrics and Gynecology

JANE MEDLAR SHULER, A.B. (Doane '35) ..... School of Medicine
Assistant in Clinical Psychology

*ANDREW KIME TEMPLES, M.D. (Ga. '34) ..... 407 Seventh Street
Assistant in Clinical Obstetrics and Gynecology

**On leave in Armed Forces.*

*Clinton Monroe Templeton, M.D. (Ga. '37).....S. F. C. Building
Assistant in Clinical Medicine

Claude Edward Tessier, M.D. (Ga. '32).....Masonic Building
Assistant in Clinical Pediatrics and Bacteriology and Public Health

Walter Gamewell Watson, B.S (The Citadel '31),
M.D. (Ga. '43).....University Hospital
Assistant in Clinical Obstetrics and Gynecology

*William Joseph Williams, M.D. (Ga. '31).....S. F. C. Building
Assistant in Clinical Surgery

RESEARCH FELLOWS

Herbert Spencer Kupperman, B.A. (Wisc. '36), M.A. (Wisc. '37),
Ph.D. (Wisc. '40).....School of Medicine
Research Fellow in Experimental Medicine

Sam Allen Singal, B.S. (Toledo '36), M.S. (Mich. '38),
Ph. D. (Mich. '40).....School of Medicine
Research Fellow in Medicine

RESEARCH ASSISTANT

Lawton Quinby Hair, B.S. (S.C. '39).....School of Medicine
Research Assistant in Experimental Medicine

OTHER OFFICERS

George Lombard Kelly, B.A. (Ga. '11), B.S.Med. (Ga.'22),M.D.(Ga. '24),
Treasurer

Mary Bethany Cumbus, *Registrar*

Martha Frances Dreyer, B.S.(Ga. '38),
Assistant Treasurer and Business Manager

Janie Turner, *Librarian*

Sadie Rainsford, A.B. (Columbia Col. '37), A.B. Lib. Sc. (Emory '41),
Assistant Librarian

ANNOUNCEMENTS FOR 1944

The one hundred and fourteenth session of the University of Georgia School of Medicine began January 3, 1944, and will end September 11, 1944.

The University of Georgia has grown in part by the creation of new departments, and in part by the absorption of certain already existing institutions founded independently, one of which was the Medical College of Georgia in Augusta, founded 1828.

The absorption of the Medical College of Georgia began in 1873, when by mutual consent of respective Boards of Trustees it became affiliated with the University as its Medical Department. This absorption was consummated in 1911. By special enactment of the Legislature the University took possession of the property and assumed control of the management of its Medical Department, which has since operated, like the other departments, under the laws and regulations of the University.

The state-supported institutions of higher learning in Georgia were integrated into the University System of Georgia by legislative enactment at the regular session of the General Assembly in 1931. Under the articles of the Act all existent boards of trustees were abolished and control of the System vested in a board of regents which has all the power and rights of the former governing boards of the several institutions. Control of the System by the Board of Regents was effective January 1, 1932.

DISCIPLINE AND GENERAL REGULATIONS

The State of Georgia extends the privileges of the University within the limits of its capacity to all persons who are qualified for admission. It is maintained at public expense for the public good. It cannot, however, be the patron of inefficiency, idleness, or dissipation. Its classes have no room except for those who diligently pursue the studies of their choice and are willing to be governed in their conduct by the rules of propriety. Every student owes to the public a full equivalent of expenditures in his behalf, both while in the institution and afterward.

The discipline of the School of Medicine is in the hands of the Dean and the Executive Committee. Formal regulations are few and general in character.

Regulations are formulated and recommended by a Student-Faculty Council. The Council acts as an advisory body in student and faculty relations.

The Student-Faculty Council is composed of five Faculty members and nine students. The pre-clinical and clinical departments are each

represented by at least two members of the Faculty. The Faculty members are elected by the student body for a term of three years. The students are represented by two members from each class together with the president of the Student Body. Two student members are elected by the first-year class in the first quarter and serve for a period of one scholastic year. Two permanent members are elected by the second-year class at the beginning of the scholastic year and serve until graduation. The committee meets three and four times a year—at least once each quarter. A chairman and secretary are elected by the committee for a term of one year.

MEDICAL SCHOOL BUILDINGS

The School of Medicine is housed in three buildings, situated on the College campus covering about forty-five acres. It is near the geographical center, and about one mile from the business center of Augusta, and is easily accessible by bus from all parts of the city.

The ground floor of the Newton Building provides quarters in the north end for the department of experimental medicine and in a portion of the south end for a dining room for the students, known as the Alumni Tavern. On the second floor are located the administration offices, the library, and the clinical pathology laboratory. On the third and fourth floors are the departments of gross and microscopic anatomy and animal surgery, with an animal room containing fifty individual cement animal cages.

The Dugas Building, erected during the 1936-1937 session, houses the departments of physiology and pharmacology and the department of biochemestry, as well as an auditorium seating 366 persons. Funds for the erection of this building were provided by the Regents of the University System of Georgia and the Public Works Administration.

The Murphey Building houses the departments of pathology and bacteriology and public health. This building was occupied in September, 1939, and funds were provided from the same sources as for the Dugas Building.

During the 1941-1942 session more than sixty thousand dollars was expended for physical additions to the Newton and Dugas Buildings. A three-story brick annex was added to the former and three two-story brick annexes were added to the latter. Sixty thousand dollars was expended during the 1942-1943 session for annexes to the Murphey Building. These enlargements were necessary because of the increased enrollment due to the school's expansion program, seventy-five first-year students being admitted each session instead of forty-eight as formerly.

DUGAS BUILDING

MURPHEY BUILDING

HOSPITALS

The City of Augusta, in 1914, completed upon the school grounds and in immediate proximity to the school building a hospital plant especially designed as a teaching hospital for the School of Medicine, and known as the University Hospital. The buildings, equipped, cost over a half million dollars. They are of modern fire-proof construction, and are furnished throughout with standard appliances of the best material and design. Of the total of 400 beds and bassinets, approximately 200 are available without restriction for teaching purposes.

In 1934, a two-story addition to the University Hospital, named the Milton Antony Wing after the founder of the School of Medicine, was completed. Funds for the erection of this building were contributed by the Federal Public Works Administration, the Alumni Association of the School of Medicine, the City of Augusta and the County of Richmond. The first floor of this building houses the out-patient department while the second floor is a contagious disease hospital.

The University Hospital is maintained by the City of Augusta. The exclusive medical and surgical control of the Hospital is vested in the University of Georgia School of Medicine. The attending staff is composed of the members of the faculty of the School of Medicine, thus assuring a proper use of the clinical material of the hospital for purposes of teaching.

In June 1937, $200,000 was made available through a bond issue to expand and renovate the University Hospital plant. This amount was increased at least fifty per cent by Federal grants. By use of these funds the following additions and renovations have been made: three-story brick annex to Doughty Nurses Home, three-story brick home for colored nurses (Lamar School), fifty per cent enlargement of kitchen and laundry, new dining-room, new clinical laboratory quarters, new emergency rooms, new X-ray quarters with new equipment, new air-conditioned operating pavilion and renovation of old operating rooms, cross corridors on third and fourth floors between center building and two wings, general renovation and addition of new equipment.

The two story wing being added to the University Hospital is expected to be finished about October 1. Arrangements have been made for a possible later addition of two more stories. The building is of reinforced concrete frame, veneered with brick to match old buildings. It will have a maximum capacity of eighty four beds. The construction and equipment of this wing will cost approximately $144,000.00.

In 1940 the Wilhenford Hospital for Women and Children was pur-

chased by the City of Augusta and converted into a hospital for tuberculous patients. It has a capacity of sixty beds.

The Georgia State School of Mentally Defective Children, which is operated by the State Board of Control, is located about eight miles from Augusta, and provides occasional demonstrations in the study of pediatric psychiatry.

CLINICAL OPPORTUNITIES

The University has medical and surgical control of the charity patients of the City of Augusta. The Out-Patient Department of the University Hospital is housed on the first floor of the Milton Antony Wing of the Hospital and has a large attendance, averaging about two hundred patients a day. A wealth of teaching material is derived from this source. Clinics are held daily by members of the out-patient staff.

Patients occupying free beds in the University Hospital and the Wilhenford tuberculosis unit are used as teaching material. Effective July 1, 1942, a state appropriation of fifty thousand dollars was made available for the free hospitalization of patients from outside Richmond County, especially from the rural counties of the state. This will mean an increase of forty beds for teaching purposes. Hospital patients are examined by fourth-term students who record the physical and laboratory findings on the patients' charts. Hospital patients are also used for demonstrations in the course in physical diagnosis in the second year.

A course in domiciliary medicine is given to the fourth-year students whose work in the patients' homes is directly supervised by special instructors employed for this purpose. The students examine these patients thoroughly and assist in their treatment which is supervised by the special instructors. This work is not only a source of great benefit to the student, but is also a great help to the patient, who in this way receives more thorough care than would otherwise be possible. It is unnecessary to emphasize the opportunity that the student has in this course to study medicine at the bedside and to gain practical knowledge of the manner of handling patients in the home.

AUTOPSIES

The City Morgue with especially designed autopsy and cold storage room occupies space in the University Hospital. A new autopsy room has been provided in the Murphey Building. Students and Staff attend autopsies which are conducted by the staff in pathology. About 100 autopsies are done annually.

LIBRARY

The Library is located in the south wing of the school building, in quarters that afford retirement, ample room and good light. The space formerly occupied by the department of bacteriology provides accommodation for a large reading room. The Library is open from nine a.m. to six p.m., except Saturdays, when it closes at one p.m. Two full time librarians are in charge. During the school session it is open five evenings a week under the supervision of a student assistant librarian.

During the 1940-1941 and 1941-1942 sessions the library was greatly improved by the physical renovation of the former bacteriology department which was made into a beautiful reading room and equipped with walnut furniture. Funds were made available through a legacy to the School of Medicine from Mrs. Julia Flournoy Moore, in honor of her father, Dr. Flournoy Carter, and known as the Moore-Carter Fund. A grant of ten thousand dollars from the Rockefeller Foundation made possible the addition of many books and bound copies of journals that were needed in order to fill out various incomplete volumes.

There are in the Library about 17,060 bound volumes. The list of books comprises many standard reference works in medicine and surgery and the fundamental sciences, as well as many of the latest text books and monographs. The Library receives more than ninety current journals, in English, French and German, in the fields of chemistry, anatomy, physiology, pharmacology, bacteriology, pathology, medicine, surgery and allied subjects. The files of many of these journals are complete to date. The Library is maintained in part by appropriation from the general fund and in part by the income from the Library Endowment, a gift from the late Doctor William J. Young. The income from this endowment is used only for books and periodicals.

REQUIREMENTS FOR ADMISSION

The minimum requirments for admission to the School of Medicine are a four-year high school education, or its equivalent, and two years of work in a college of arts and sciences approved by the Council on Medical Education and Hospitals of the American Medical Association. Three years of college work have been required and will be again after the war.

The two years of college work shall comprise at least sixty semester hours, exclusive of military and physical education, extending through two sessions of thirty-two weeks each, exclusive of holidays, in an approved college. Where qualifications are equal, preference is given to applicants who have completed four years of college work.

The School of Medicine reserves the right to require more than the minimum hours here set down for admission.

SUGGESTIONS REGARDING INDIVIDUAL PREMEDICAL SUBJECTS

(a) CHEMISTRY. Twelve semester hours required, of which at least eight semester hours must be in general inorganic chemistry, including four semester hours of laboratory work; and four semester hours in organic chemistry, including two semester hours of laboratory work. In the interpretation of this rule, work in qualitative analysis may be counted as general inorganic chemistry. One course in quantitive analysis is also required.

(b) PHYSICS. Eight semester hours required, of which at least two must be laboratory work. It is urged that this course be preceeded by a course in trigonometry.

(c) BIOLOGY. Eight semester hours required, of which four should consist of laboratory work. This requirement may be satisfied by a course of eight semester hours in either general biology or zoology, or by courses of four semester hours in zoology and botany, but not by botany alone.

(d) ENGLISH COMPOSITION AND LITERATURE. The usual introductory college course of six semester hours, or its equivalent, is required.

(e) NONSCIENCE SUBJECTS. Of the sixty semester hours required as the measurement of two years of college work, at least eighteen, including the six semester hours of English, should be in subjects other than the physical, chemical or biologic sciences.

(f) FOREIGN LANGUAGE. A reading knowledge of a modern foreign language is strongly urged. If the reading knowledge of this language is obtained on the basis of high school work, the student is urged to take another language in his college course. It is not considered advisable, however, to spend more than twelve of the required semester hours on foreign languages.

SCHEDULE OF SUBJECTS OF THE THREE-YEAR PREMEDICAL COLLEGE COURSE. SIXTY SEMESTER HOURS* REQUIRED.

	Semester Hours
Required Subjects:	
Chemistry (a)	12
Physics (b)	8
Biology (c)	8
English composition and literature (d)	6
Other nonscience subjects (e)	12
Subjects Strongly Urged:	
A modern foreign language (f)	6-12

Advanced botany or advanced zoology	3-6
Psychology and Logic	3-6
Advanced mathmatics, including algebra and trigonometry	3-6
Additional courses in chemistry	3-6

Other Suggested Electives:

English (additional), economics, history, sociology, political science, mathematics, Latin, Greek, and drawing.

(g) In General. This premedical course in both quantity and quality must be such as to make it acceptable as the equivalent of the first two years of the course leading to the degree of Bachelor of Science or Bachelor of Arts in approved college of arts and sciences.

*A semester hour is the credit value of sixteen weeks work consisting of one lecture or recitation period per week, each period to be not less than fifty minutes net, at least two hours of laboratory work to be considered as the equivalent of one lecture or recitation period.

APPLICATIONS FOR ADMISSION

Students desiring admission will be furnished with proper blanks, together with instructions for filling them out. Application forms, when properly filled out, should be returned to the School of Medicine at Augusta. In conformity with the State law, all credentials are acted upon by the State Examiner.

Application for addmission should be made not later than five months before the date set for the opening of the session. If there are any vacancies, applications for advanced standing may be considered later than the time limit set for first-year students.

The number of students accepted is limited. Preference is given to residents of Georgia. The Committee on Admissions considers the merits of each applicant with the utmost care. The following factors are taken into consideration in selecting from the list of applicants students for admission: scholarship, score on the Medical Aptitude Test of the Association of American Medical Colleges, and physical fitness. The applicant is required to take the aptitude test and may be required to report at the college for personal interviews.

Upon being notified of acceptance, the applicant must deposit twenty-five dollars with the school, as otherwise the place will not be held open to the exclusion of some other qualified applicant. This deposit will not be returned under any condition but will be credited on fees and deducted from the payment due when the student matriculates.

Women are admitted on the same basis as men.

All communications should be addressed to the University of Georgia School of Medicine, Augusta, Georgia.

ADMISSION TO ADVANCED STANDING

A student desiring admission to advanced standing is required to present satisfactory evidence that his preliminary and medical education is equivalent to that required of the class to which admission is sought. All high school and college credentials are passed upon in the same manner as those of the applicant for admission to the first year course. Students from accredited medical schools whose record of work is satisfactory may be admitted to advanced standing without examination, though the right of requiring examination is not waived. Students will not be received into any class unless there are vacancies.

With all applications for advanced standing the Committee on Admissions requires a statement from the Dean of the medical school previously attended indicating that the applicant is in good standing and eligible to continue at that school and recommending him for transfer. The Committee considers only those applicants who have clear records and whose comparative standing places them in the middle or upper third of their class. Students are not accepted for admission to the fourth-year class.

REQUIREMENTS FOR GRADUATION

A candidate for the degree of Doctor of Medicine from the University of Georgia School of Medicine must be of good moral character and at least twenty-one years of age. He must have successfully completed four years of medical study in accredited institutions, the last two years of which shall have been in this school. He must be free from indebtedness to the School of Medicine.

LICENSING BOARD EXAMINATIONS

The members of the graduating class may take the examination given by the Georgia State Board of Medical Examiners shortly after commencement. Examinations in the past have been held in Augusta and this arrangement will in all probability continue. The examination fee is $20.00.

Under reciprocity agreements, thirty-six other states and the District of Columbia accept licentiates of the Georgia State Board of Medical Examiners.

Parts I and II of the National Board examinations are held under the auspices of the School of Medicine in Augusta. Part III has to be taken elsewhere. Part I covers the work of the first two years and Part II the work of the last two years in the Medical School. Part III consists of a practical examination after the satisfactory completion of an internship of one year.

Fees for the examinations of the National Board are as follows:

Registration fee		$ 5.00
Part I		20.00
Part II		20.00
Part III, Admission fee	$10.00	
Final Payment	30.00	$40.00

The fee for Part III may be borrowed from the National Board of Medical Examiners on a note for one year.

The certificate of the National Board is recognized by the licensing authorities of forty-three states and four territories. It is also recognized by certain Federal services and by some foreign countries. Diplomates of the National Board are exempted from the scientific examination given by the American College of Surgeons and are admitted to the Mayo Foundation without taking the usual examination.

ALPHA OMEGA ALPHA

The medical honor fraternity, Alpha Omega Alpha, has established a chapter at the University of Georgia School of Medicine. Students of the third and fourth year classes are approved for candidacy by the officers of the school and elections are made by the active members of the chapter.

SPECIAL STUDENTS

Those desiring to take only particular courses may be registered as special students upon securing the approval of the Dean and making satisfactory arrangements with the heads of the departments in which the work is to be done.

POST GRADUATE WORK

Graduates in medicine who desire to do post-graduate work may make the necessary arrangements for it with the Dean and the heads of the departments in which they wish to work. No fees will be charged individuals working in this manner. Fees will be charged only when formal post-graduate courses are offered.

FELLOWSHIPS

Research fellowships are offered, with a stipend of $900.00 per annum. These fellowships vary in the departments from year to year. Candidates for these fellowships are required to have the degree of doctor of medicine, doctor of philosophy, or doctor of science.

EXAMINATION AND PROMOTION

In order to be eligible for credit in major courses (those of one hundred hours or more) the student must attend a minimum of eighty per cent of the class exercises of each course. Time lost by absences for any reason in major or minor courses must be made up to the satisfaction of the instructor in charge of the course.

Final examinations are held at the conclusion of the various courses. These examinations may come at the end of the first, second or third trimester, or at any time within a trimester that a course may be completed. The passing mark is 75 per cent. Whenever a student makes a grade of less than 70, the course must be repeated with credit before promotion to the next year or before graduation. Students who are required to withdraw from school on account of scholastic failures will not be re-admitted. No student will be allowed to repeat more than one year during the medical course on account of scholastic failures.

At the end of each school year there will be a meeting of the Promotion Boards to pass on the promtotion of each individual student. Recommendations for degrees are made by the faculty as a whole.

Any student who by reason of a lack of sobriety, honesty or moral character manifests a distinct unfitness for the practice of medicine, will be required to withdraw from the school. Cheating in any form at any time will be punished with a minimum suspension from school for the remainder of the scholastic year, with failure in the course in question.

PROMOTION BOARD REGULATIONS

1, Weighted averages of all students' grades for the year shall be calculated and shall be available at the time of faculty action.

2. A student shall be required to have such a weighted average of at least 75 to be considered for either promotion or any recommendation.

3. In the case of students repeating the year, this weighted average requirement shall stand at 80 instead of 75.

4. A grade of 70 to 74 inclusive shall no longer carry automatically the privilege of re-examination, but any grade below 75 shall be considered a failure unless the department concerned indicates on the grade report that the privilege of re-examination is extended.

It is felt that this provision will allow the necessary latitude of treatment of different kinds of courses. Re-examinations may be offered if circumstanes warrant them. But longer courses, in which early re-examinations do not seem of practical value, may draw the line between "pass" and

THE UNIVERSITY HOSPITAL, AUGUSTA, GEORGIA

THE WILHENFORD TUBERCULOSIS HOSPITAL

"fail" and still use the 70-74 grades. This should prejudice the student's weighted average less than does the present necesity for recording a failure as a 69 or less. And of course the discretionary power of the Promotion Boards may safeguard any student's career as it does now.

5. No student shall be allowed the privilege of re-examination in more than one course if his deficiencies aggregate 21% or more of the year's work.

It is felt that this provision will furnish a sounder basis for determining the amount of work to be made up than does the present mere number of courses.

6. At meetings of the Promotion Boards, students repeating a year shall be considered first, followed by the other students in descending order of the weighted average grades.

REGISTRATION

Each student before beginning any class work is required to register at the office. All credentials pertaining to entrance requirements must have been approved. Students will not be permitted to register later than two weeks after the opening of the session. First year students are required to register on the first day of the registration period. Any student accepted for admission to the first-year class who fails to report on the date set for first-year registration forfeits his place in the class.

Penalty Fee: A penalty fee of $5.00 is charged students who register later than the regular registration day for the first trimester, or pay fees later than dates due at the beginning of the second and third trimesters.

TUITION AND FEES

In conformity with the regulations governing other branches of the University of Georgia, the School of Medicine does not require tuition fees of residents of the state.

Beginning with the session 1940-1941 the laboratory fees for residents of Georgia have been increased from $185.00 to $225.00 per year, payable in three installments of $75.00 each, at the beginning of each trimester.

Non-residents are admitted for the duration of the war. The fees are $445.00 per session or 148.33 per quarter.

A breakage deposit is required of each student to cover possible injury to the property of the University. The unused portion of this deposit is returned at the end of the college year. The breakage deposit for first-year students is $15.00; for second, third and fourth-year students, $10.00.

Payment of a health and student's activities fee of $7.50 is required of

each civilian student, and $2.50 of each student under the ASTP and V-12 (S) Program. Students under the ASTP and V-12 (S) Program who become ill are taken care of by the local Government Infirmaries.

Wives and children of medical students, who are domiciled with them, may be included in the student's hospitalization plan upon payment of a fee of $4.00 for each such dependent. This fee is optional and is payable upon registration for the first quarter.

Upon graduation each student is charged a diploma fee of $5.00.

All fees and other charges are subject to change at the end of each quarter or semester.

This bulletin is publsihed as a source of information only.

No statements herewith are to be considered as a set of by-laws for the conduct of the school.

Statements published herewith are subject to change without notice.

REFUND OF FEES

No refund of laboratory fees is made except on account of serious illness. A student withdrawing within four weeks after the beginning of any quarter, who secures from the Dean a statement of honorable standing and from a physician a certificate of inability to remain in attendance, is allowed a refund of one half of the payment due on fees at the time of registration, and all of any amount paid in advance on undue fees. No refund is allowed a student who withdraws later than four weeks after the beginning of the quarter for which the fees were paid.

STUDENTS' AID

CHARLES MCDONALD BROWN SCHOLARSHIP FUND. This endowment was established in 1883, by the Hon. Joseph E. Brown, ex-Governor of Georgia, in memory of his son, Charles McDonald Brown, of the Class of 1878, for the purpose of aiding young men in defraying the expenses of their education. The interest on this fund is lent to worthy young men on condition that they obligate themselves to return it with four per cent interest.

By the rules and regulations for the administration of this fund, any student in the School of Medicine is eligible to participate in its benefit. A special circular information concerning the fund and blank forms of application will be supplied on request. Applications for loans from this fund must be made on these forms and must be in the office of the Registrar of the School of Medicine two weeks before commencement. Only $150.00 a year is allowed a borrowing student.

The Students Loan Fund, founded in 1926 by Dr. James Russell Howell of the class of that year, was begun for the purpose of assisting "deserving

students in equipping themselves for the medical profession." Contributions to the fund consist of the unused portions of breakage fees deposited by members of the fourth year class, these unused portions being left by each graduating class as a memorial. The names of the students and the amount donated in this manner by each member of the class are duly placed on permanent record.

The income from the Eugene E. Murphey Fund, donated by Mr. Byron B. Taggart in honor of Dr. Murphey, is loaned to deserving students at a moderate rate of interest.

In 1942 and 1943, grants amounting to fifteen thousand dollars were made by the W. K. Kellogg Foundation for the purpose of aiding students, particularly those who would not be able to remain in school because of the cessation of the summer vacation under the accelerated program. This grant was accepted by the school and the amount has been loaned to students. It is expected that the Fund through repayments will be a permanent loan fund.

STUDENT EXPENSES

In addition to the fees payable to the college, from $50.00 to $100.00 a year is required to cover the cost of textbooks and instruments used by the student.

Suitable board and room may be obtained in the vicinity of the college for $8.00 to $10.00 a week.

There are no extra fees with the exception of the diploma fee.

RULES REGULATING STUDENT HEALTH SERVICE

A fee of $7.50 is charged each civilian student, and $2.50 each student under the ASTP and V12 (S) Program, at the time of matriculation, and the proceeds from the fees paid by all students are used for student health service and student recreation facilities. It is hoped that a reserve for student health service can be built up over a period of years in order to make the regulations concerning the service more liberal. For the present the following rules will govern the health service for the student body until further notice:

1. The health service for each school session will be in effect from the first day of matriculation until the day of graduation, and will not cover any days between sessions.

2. Hospitalization must be approved in each instance by the Professor of Medicine or the Professor of Surgery or their properly designated assistants with the exception of eye, ear, nose and throat cases, in which case any faculty member in this department may approve hospitalization.

3. Semi-private accommodations will be furnished for a total of 21 days in any school year. This is at the rate of $4.00 a day in the University Hospital. Students desiring private accommodations at $5.00 or $6.00 a day must pay the difference.

4. Included in semi-private accommodations will be operating room charges, X-ray charges up to $10.00, laboratory fee $2.00, physical therapy up to $10.00.

5. Students with positive tuberculin test may have chest plates made if authorized by the head of the Department of Tuberculosis.

6. Students not hospitalized may have X-ray, physical therapy or other diagnostic or therapeutic measures with proper authorization.

7. Special nursing service is not included.

GENERAL PLAN OF INSTRUCTION

The regular course extends through four sessions of thirty-three weeks each. Each session is divided into three quarters of eleven weeks each, exclusive of holidays.

Beginning in July 1942 the School of Medicine adopted the accelerated program suggested by the Association of American Medical Colleges and will begin a new session approximately every nine months through June, 1945, or longer if conditions demand it. Practically every approved medical school in the United States has adopted this program.

The work of the first two years is devoted principally to a study of the fundamental sciences of chemistry anatomy, physiology, pharmacology, pathology and bacteriology. The instruction is largely practical and most of the time is spent by the student in the laboratory, working under supervision. The laboratory work is supplemented by lectures, quizzes and conferences, which are designed to explain the fundamental principles of the subjects studied and to emphasize their relation to the study of medicine. In the second trimester of the second year clinical work is introduced by the courses in physical diagnosis, clinical pathology and surgery.

During the third year, besides attending lectures and demonstrations, the student spends a considerable part of his time in the medical and surgical clinics. Here, under supervision of the attending staff, he examines patients, prepares case records, makes diagnoses and outlines the indicated treatments.

In the fourth year, instruction is given almost wholly in the wards of the hospital, in the out-patient department, and in the course in domiciliary medicine in the patients' homes.

A detailed description of the work in the various years is given under the separate departmental announcements.

DEPARTMENTS

GROSS ANATOMY

Dr. G. Lombard Kelly, *Professor*
Dr. Lane H. Allen, *Professor*
Dr. W. F. Alexander, *Assistant Professor*
Dr. E. M. Bradley, *Assistant Professor*

The facilities of the department include two well-lighted dissecting rooms, with supply-room and embalming and storage-room for cadavers, a preparation room, lecture-room with projection apparatus, a museum of anatomical specimens, models and charts, an animal house with ample supply of laboratory animals, an operating room with complete equipment for septic work, photographic and charting rooms and offices for the staff.

The required courses given by the department are designed (1) to enable the student to secure a comprehensive knowledge of the anatomy of the humman body; (2) to develop in the student independence and initiative and the ability to make firsthand observations and records. The courses in gross, topographical and clinical anatomy are correlated with the work given in microscopic anatomy, surgery and medicine wherever practicable. Elective courses are offered for students who desire to extend their knowledge of anatomy beyond that obtained in the required courses, and for those wishing to undertake investigation of anatomical problems.

101. Gross Anatomy. The basis of this course consists of the dissection of the human body. This work is done under close personal supervision of the teaching staff and oral examinations are held at stated intervals. The use of the accessory techniques provided in the museum is encouraged. Radiographic studies of the normal are available to the student. Students are supplied with a set of bones for the study of osteology. In this latter course didactic hours are correlated with the dissection of the body. Students are required to draw all of the bones in the body. For study of the individual bones of the skull, the students in groups use disarticulated skulls. First year, first trimester, 22 hours a week; second trimester, 20 hours a week, 462 hours. *Professors Kelly, Allen, Alexander and Bradley.*

101A. Clinical Anatomy. A new course to stimulate the interest of the student in gross anatomy. The demonstrations and lectures are given by clinical professors in the various specialties. The class sees lumbar and cisternal punctures, paracentesis thoracis and abdominis and like procedures and attends clinics on cases that are correlated with gross anatomy. First year, first 7 weeks of first trimester, 1 hour a week, 7 hours. *Members of the clinical staffs.*

104. NEURO-ANATOMY. This course consists of the study of the gross and microscopic anatomy of the central and autonomic nervous systems. The cellular and fibrous arrangements are considered in a complete Nissl and Weigert series, each student having a set of slides taken at intervals of 200 micra. Special stains and degeneration preparations are also utilized. The angiology and embryology of the brain and cord are included. First year, third trimester, 9 hours a week; lecturers, 22 hours; laboratory, 77 hours. *Professor Alexander and Staff.*

201. TOPOGRAPHICAL AND CROSS-SECTION ANATOMY. The first half of this course is designed to lay the foundation for the application of the principles of physical diagnosis. The student learns, by lecture and laboratory work, to project upon the surface of the body the various underlying structures. In the second half of the course anatomical relations are taught by means of cross sections. The lecture series reviews the entire field of gross anatomy and emphasizes topics of special clinical importance. Second year, third trimester. 8 hours a week, didactic, 44 hours; laboratory, 44 hours. *Professors Kelly, Allen and Bradley.*

301. ADVANCED ANATOMY AND INVESTIGATION. To qualified students and graduates informal advanced courses in the different branches of anatomy are offered. During the third trimester opportunity for informal dissection of the infant as well as the adult is offered to interested workers. Registration and the payment of a laboratory fee ten days before the third trimester is required. Enrollment is limited.

Encouragement and opportunity are also given to students and others who have sufficient preparation to undertake the investigation of original problems in anatomy. A reading knowledge of French and German is essential. *Professors Kelly, Allen, Alexander and Bradley.*

MICROSCOPIC ANATOMY

Dr. Joseph Krafka, *Professor*
Dr. Lester L. Bowles, *Assistant Professor*
Dr. Charles R. Noback, *Assistant Professor*

The facilities of the department include a well-lighted laboratory for microscopic anatomy, an adjacent preparation room fully equipped with microtomes, ovens, etc., a lecture room with projection apparatus, a dark room for photomicrography, offices and laboratories for the staff. An anatomical museum, animal house and operating room are shared in common with the department of gross anatomy. Extensive series of histological and embryological preparations are available as individual loan sets to the students.

The required courses offered by this department are designed to enable the student to secure a comprehensive knowledge of the cellular structure of the body, of its mode of development and the factors responsible for its growth and differentiation. The work is correlated, as far as practical, with the courses in gross anatomy, physiology and pathology. In addition to the didactic and laboratory work, a special course is required in methods of securing information from the current literature.

102. Histology, human. A study of the classical fundamental tissues is followed by a systematic examination of the organs, including the eye and the ear. Lectures, textbook assignments and frequent written examinations constitute the didactic work while individual study and drawings from prepared slides comprise the laboratory assignments. A special effort has been made to introduce material of practical clinical significance such as Pacchionian granulations, Purkinje fibres, coronary arteries and paranasal sinuses. First year, first trimester, 14 hours a week; lectures 55 hours; laboratory 99 hours. *Professors Krafka, Bowles and Noback.*

103. Embryology, human. This course covers maturation, fertilization, cleavage, formation of the germ layers, development of the external body form, histogenesis and organogenesis. Practically the entire laboratory work is now organized around a set of human embryos representing all of the significant stages of development. These slides are loaned to the students for the duration of the course. First year, second trimester, 9 hours a week; lecture 33 hours, laboratory 66 hours. *Professors Krafka, Bowles and Noback.*

105. Bibliography. This course is intended to acquaint the student with the methods of referring to the scientific and medical literature. As practice in the work, a subject is assigned to each student on which he is to write a paper with a complete and accurate bibliography. First year, first trimester, 1 hour a week, 11 hours. *Professor Krafka.*

BIOCHEMISTRY

DR. CARLTON H. MARYOTT, *Professor*
DR. ALFRED P. BRIGGS, *Associate Professor*
DR. SAM A. SINGAL, *Assistant Professor*
DR. W. KNOWLTON HALL, *Assistant Professor*

Courses in general inorganic chemistry, qualitative analysis, quantitative analysis, and organic chemistry are prerequisites for this work.

101. BIOCHEMISTRY. The first part of this course consists of a study of the chemical composition and reactions of the carbohydrates, lipids, proteins, and other substances of biological interest. The various tissues and fluids of the body are then studied, and considerable quantitative work is done in food, gastric juice, blood and urine. Nutrition and metabolism receive particular attention, and metabolism experiments are conducted by members of the class. Frequent references are made to current literature. First year, second trimester, 9 hours a week; third trimester, 15 hours a week; 264 hours, *Professors Maryott, Briggs, Singal, and Hall.*

301. CLINICAL BIOCHEMISTRY. Normal metabolic processes will be reviewed. Disturbances to the normal metabolism will be pointed out. Patients presenting metabolic disturbances will be demonstrated and discussed. Third year, second trimester, 2 hours a week; 22 hours. *Professor Briggs.*

Advanced theoretical or practical courses in Biochemistry are offered by the staff to students, who, having had course 101 or its equivalent, wish to continue further the study of Biochemistry. Hours to be arranged.

In addition to the above courses, opportunity is given to qualified students to enter upon the investigation of new problems.

PHYSIOLOGY

Dr. W. F. Hamilton, *Professor*
Dr. Philip Dow, *Associate Professor*
Dr. John W. Remington, *Assistant Professor*

101-201. Physiology. In the lectures of this course the object is to acquaint the student with the more fundamental concepts of physiology and to consider in detail those portions of the subject that are essential to an undersanding of the phenomena of health and disease in man.

The laboratory exercises are planned to discipline the student in the method of experimentation as applied to the acquisition of physiological knowledge, and to give him first-hand experience with the principal types of experiments employed in the analysis of function. The work on cold blooded animals is held to the minimum necessary to establish elementary experimental technique. The more detailed experiments are performed on mammals and on the students themselves. It is th opinion of the department staff that fundamental scientific problems can best be emphasized in laboratory problems which are of obvious interest directly in terms of the students' ambition to become practical physicians.

Conferences and demonstrations supplement the more formal instruction.

First year, third trimester, 8 hours a week, 88 hours; second year, first trimester, 12 hours a week, 132 hours. *The Staff.*

PHARMACOLOGY

DR. R. A. WOODBURY, *Professor*
DR. BENEDICT E. ABREU, *Associate Professor*
DR. DAVID F. MARSH, *Assistant Professor*

201. PHARMACOLOGY AND TOXICOLOGY. Class room instruction has for its main objective the study of the influence of drugs on pathologic and normal biochemical and physiological processes. Instruction in the purely physical or chemical properties of drugs is only to the extent of their direct bearing on pharmacology. The student is encouraged to carefully assemble pharmacologic data of such nature as to enable him to practice rational therapeutics later as a physician.

The department is in accord with the trend towards the limitation of drug therapy to observable beneficial effects. To this end the scope of drugs studied by the student is sharply curtailed. This affords an opportunity of acquiring that working knowledge of the modes of action of drugs so essential to their proper use. As a result, closer correlation is possible between the department and clinical instruction in the use of drugs, whether for diagnosis, prevention, or cure of diseases. The closer the correlation between these departments, the better is the student prepared to utilize drugs in practice. Each student acts as observer in the drug room for a limited time. Definite laboratory periods are devoted to the study of the influence of drugs upon the sick patient by the use of descriptions of history and symptoms of typical patients.

Experiment and demonstrations are carefully chosen as the basis of class room instruction. The scope of the laboratory exercises covers certain chemical and physical properties of drugs, and the important local and systematic effects of these drugs on the various organs and systems of the mammalian body. This laboratory work should encourage insistence upon controlled therapeutic results later when the student is engaged in clinical work as a physician.

Second year, second trimester, 19 hours a week; third trimester, 1 hour a week; 220 hours. *The Staff.*

PATHOLOGY

Dr. Edgar R. Pund, *Professor*
Dr. Stewart H. Auerbach, *Associate Professor*
Dr. A. J. Waters, *Instructor*
Dr. J. W. Harner, Jr., *Instructor*

201. General Pathology, Morbid Anatomy and Histology. This is a course in the fundamental principles and processes of general pathology; the regressive changes, the progressive changes, including tumors, and inflammation. Because the study of pathology differs considerably from that of the other preclinical subjects, an attempt is made to conduct the course as an introduction into the clinical branches.

At the daily exercises a process is first explained and then illustrated by gross demonstration of selected specimens and by projection demonstration of microscopic slides. The specimens are then distributed for study. The student studies the specimen; then makes a drawing in the note-book; and also permanent notes descriptive of the process as a whole.

The student is taught to regard the structural changes not as the whole of pathology, but rather as examples and illustrations of the effects of morbid processes. Functional changes are explained in lectures and are stressed in the recitations.

The museum is well supplied with selected and attractively preserved specimens. The microscopic slides are loaned from a collection. The course in General Pathology is continuous with the course in Special Pathology.

202. Special Pathology. A course in the disease of the symptoms, including Gynecological Pathology and Neuropathology.

The plan of the work is the same as in the course in General Pathology to which indeed this course is directly complementary. In addition, attention is given to surgical pathological diagnosis. Fresh surgical specimens are demonstrated to small groups, and the gross study is followed by individual microscopic study of selected specimens. The student is required to submit a written report describing in detail the morbid changes. Second year, first trimester, 9 hours a week, 99 hours; second trimester, 12 hours a week, 132 hours; third trimester, 6 hours a week; 66 hours. Total hours 297. *Drs. Pund, Auerbach and Waters.*

203. Necropsies. The necropsies are done in a specially equipped amphitheatre, which is conveniently located in the building of the Department of Pathology. The second-year class is required, and the third and fourth-year classes encouraged to attend. *The Staff.*

401. CLINICAL PATHOLOGICAL CONFERENCE. In cooperation with the clinical departments, conferences are held upon the cases which come to necropsy. That member of the fourth year class to whom the case had been assigned in the hospital presents the clinical history. The case is discussed by a selected student of the fourth year class and then by the head of the clinical department. The pathologist presents the finding of the necropsy and attempts to correlate his observations with the clinical course. Fourth year, 1 hour a week; 33 hours. *The Staff.*

Encouragement and opportunity are offered to qualified students to follow advanced work and to a few graduates to learn the common methods of investigation employed in research in pathology.

BACTERIOLOGY AND PUBLIC HEALTH

Dr. Everett S. Sanderson, *Professor*

Dr. Robert B. Dienst, *Associate Professor*

Dr. J. Fred Denton, *Assistant Professor*

Dr. Claude E. Tessier, *Clinical Assistant*

Dr. Archie L. Haggerty, Director, Food, Milk and Meat Sanitation, Richmond County Health Department, *Field Demonstrator*

Medical Staff, Camp Gordon, *Lecturers in Military Medicine*

101. Public Health. An introductory course to Public Health. In addition to lectures, students will be assigned topics of a public health nature upon which they will be required to write a term paper. First year, first trimester, 1 hour a week; 11 hours. *Dr. Sanderson.*

201. Microbiology and General Immunology. The course is designed to familiarize students with the principles of microbiology with special emphasis on those organisms producing disease conditions in man, together with the application of measures for their control, and a discussion of the mechanism of infection and resistance. The disease producing properties of the commoner pathogenic bacteria, with methods for their cultivation, isolation and identification will be studied in the laboratory. The principal serologic methods of diagnosis will also be carried out. Second year, first trimester, 16 hours a week; 176 hours. *Drs. Sanderson, Dients and Denton.*

202. Clinical Parasitology. Diagnostic Laboratory Procedures and Control Measures. The course consists of lectures, demonstrations and laboratory studies of the animal parasites of man and their mode of transmission. The field of study covers protozoans, helminths and arthropods of medical importance. Second Year, second trimester, 6 hours a week; 66 hours. *Drs. Dienst* and *Denton.*

301. Public Health. Field Trips. The course is designed to familiarize students with modern health measures as exemplified in water purification, sewage disposal, mosquito control, dairy farm and milk plant sanitation, meat canneries and meat inspection, school hygiene, industrial hygiene, rural sanitation, diagnostic laboratory procedures, city, county, state, and federal health department organizations, etc. In so far as possible, these trips will be supplemented by lectures devoted to health problems as related to the State of Georgia and presented by members of the staff of the Georgia State Department of Health. Third year, first trimester, 4 hours a week; 44 hours. *Drs. Sanderson, Dienst, Haggerty and Heads of Divisions of State Health Department.*

303. PUBLIC HEALTH. Industrial Hygiene and the Epidemiology of Industrial Diseases. The course will be devoted to the study of the more common industrial hazards, accidents and infections and methods of prevention. Lectures and discussions will be supplemented by field trips to industrial establishments in the Augusta area. Third year, third trimester, 3 hours a week; 33 hours.*Dr. Sanderson.*

401. PUBLIC HEALTH. School Hygiene. Students in small groups will be assigned to the public schools of Richmond County. Instruction will be devoted to the detection of physical defects of school children, the interpretation of Schick and tuberculin tests, and the procedures employed in prophylactic immunization. Fourth year, ⅓ of class, repeated each trimester, 2 hours a week; 22 hours. *Dr. Claude E. Tessier.*

402. MILITARY MEDICINE. A series of lectures devoted to medical organization of the Army; camp sanitation and sanitation in the field; control of venereal diseases, and aspects of other medical problems associated with the health and well being of the Armed Forces. Some of the work will entail field observations at Camp Gordon. Fourth year, third trimester, 2 hours a week; 22 hours. *Medical Staff, Camp Gordon.*

405. PUBLIC HEALTH. Health Surveys. Elective. The opportunity to make a health survey will be given to those who desire to do so. Communities not larger than 10,000 to 20,000 population are to be preferred. A properly completed survey will give to the student an idea of actual community heatlh conditions, deficiencies, health organization set-up, difficulties encountered in health administration, etc., as can be obtained in no other way. Offered to students in the third and fourth year. Hours to be arranged. *Dr. Sanderson.*

The Department of Bacteriology and Public Health is equipped for research and offers to properly qualified undergraduate and graduate students opportunities to undertake original investigative work. Physicians and dentists who may be interested in some special problem may apply for space and materials.

MEDICINE

Dr. V. P. Sydenstricker, *Professor*
Dr. Warren Coleman, *Clinical Professor*
Dr. W. J. Cranston, *Clinical Professor*
Dr. E. E. Murphey, *Clinical Professor*
Dr. A. P. Briggs, *Associate Professor*
Dr. H. T. Harper, Jr., *Associate Professor*
Dr. J. H. Butler, *Associate Clinical Professor*
Dr. A. A. Walden, *Associate Clinical Professor*
Dr. N. M. DeVaughn, *Assistant Professor*
Dr. C. W. Hock, *Assistant Professor*
Dr. F. Lansing Lee, *Assistant Professor*
**Dr. M. W. Mathews, *Assistant Professor*
Dr. H. G. Mealing, *Assistant Professor*
*Dr. H. L. Schmidt, *Assistant Professor*
Dr. J. W. Brittingham, *Assistant Clinical Professor*
Dr. J. D. Gray, *Assistant Clinical Professor*
*Dr. Irvine Phinizy, *Assistant Clinical Professor*
Dr. T. B. Phinizy, *Assistant Clinical Professor*
*Dr. D. R. Thomas, Jr., *Assistant Clinical Professor*
Judge Gordon W. Chambers, *Lecturer*
*Mr. F. C. McClure, *Lecturer*
Dr. Phyllis Johnson, *Clinical Assistant*
Dr. J. M. Martin, *Clinical Assistant*
*Dr. C. M. Templeton, *Clinical Assistant*
Dr. S. A. Singal, *Research Fellow*

Instruction in physical diagnosis and clinical pathology is begun in the second trimester of the second year; both subjects are taught largely by demonstration and practical exercises. Throughout the third year advanced work in physical diagnosis is given using selected cases from the abundant material of the out-patient department. During this year a comprehensive survey of medicine is given by means of a recitation course based on a standard text. Therapeutics is emphasized. In the fourth year two hours a week are devoted to clinical lectures and demonstrations, the great bulk of instruction being carried on at the bedside.

201. Physical Diagnosis. Recitations, demonstrations and practical exercises. Emphasis is laid on normal physical signs. Second year, second trimester, 2 hours a week; third trimester, 7 hours a week; 99 hours. *Dr. Harper and Staff.*

*On leave with Armed Forces.

**On leave of absence for one year.

202. CLINICAL PATHOLOGY. Lectures and practical exercises covering the field in this subject. Standard methods are taught. Beginning with examination of the urine and blood, the course is continued to include all the usual laboratory procedures, blood chemical determinations and clinical bacteriology. The hospital furnishes an abundant supply of material. The student carries out all the procedures. Second year, third trimester, 9 hours a week; 99 hours. *Drs. Mealing, Briggs, Mathews* and *Hock.*

301. MEDICINE. A large part of general medicine is covered in this course in recitations based on a standard text. Diseases that are frequently seen in the clinics are not emphasized here. Third year, first trimester, 3 hours a week; second and third trimesters, 2 hours a week; 77 hours.*Dr. DeVaughn.*

301-a. ENDOCRINOLOGY. This course presents in detail the most important endocrine disturbances and methods of treatment. Third year, first and second trimester, 1 hour a week; 22 hours. *Drs. Lee and Greenblatt.*

302. CLINICAL MEDICINE. Practical instruction is given to small groups in the out-patient department, covering history taking, physical examination, diagnosis and treatment. The student is assigned a newly admitted patient, required to take a complete history and after examining the patient suggest therapy. All phases of this work are supervised. The follow-up of return cases is an important part of this work. Approximately 4,500 patients are admitted to the medical division of the out-patient department each year. Third year ⅓ of class, 8 hours a week; 88 hours. Repeated each trimester. *Drs. Sydenstricker, Briggs, Mealing, Gray, Harper, Butler, DeVaughn, Mathews* and *Hock.*

303. THERAPEUTICS AND MATERIA MEDICA. A general course covering the necessary instruction in these subjects. Third year, first trimester, 3 hours a week; second trimester, 2 hours a week; 55 hours. *Dr. Walden.*

304. WARD ROUNDS. Ward Rounds for the third year class are conducted three times a week. Third year, ⅓ of class, 3 hours a week; 33 hours. Repeated each trimester. *Drs. Sydenstricker* and *Hock.*

401. APPLIED THERAPUTICS. This course presents in detail the most important methods of treatment. Fourth year, first and second trimesters, 1 hour a week, 22 hours. *Dr. Lee.*

402. MEDICAL CLINICS. Fourth year, first and second trimesters, 2 hours a week; third trimester, 1 hour a week; 55 hours. *Drs. Sydenstricker, Harper and Brittingham.*

403. MEDICAL JURISPRUDENCE. A lecture course on the more important

phases of this subject. Fourth year, third trimester, 1 hour a week, 11 hours. *Judge Gordon W. Chambers.*

404. Ward Rounds and Ward Work. For a period of eleven weeks one-third of the fourth-year class is assigned to the medical wards as clinical clerks. Each patient entering the wards is assigned to a student who records the history and physical findings and carries out the routine laboratory procedures. The students are required to attend ward rounds with visiting physicians daily and make notes on the patient's progress and on the therapeutic measures employed. Fourth year, ⅓ of class, 5 hours a week; 55 hours. Repeated each trimester. *Drs. Sydenstricker, Harper, Cranston,* and *Gray.*

405. Domiciliary Medicine. Under the supervision of members of the Staff fourth-year students attend the sick poor in their homes in one district of the city. History, physical examination and laboratory examinations are made and recorded and daily visits paid, each case being followed to its completion. These are daily conferences where the instructor meets the group of students and a history meeting is held once a week. One-third of the fourth-year class is assigned to this work for one trimester. *Drs. Lee and Resident Staff.*

406. Syphilis Clinic. Fourth year, ⅓ of class, 4 hours a week, 44 hours. Repeated each trimester. *Dr. Brittingham and Resident Staff.*

407. Diabetic Clinic. Fourth year, ⅓ of class, 1 hour a week; 11 hours. Repeated each trimester. *Drs. Briggs and Gray.*

408. Cardiac Clinic. Fourth year, ⅓ of class, 1 hour a week; 11 hours. Repeated each trimester. *Drs. Cranston and Harper.*

409. Clinical Pathological Conference. Clinical and autopsy findings are compared and correlated. The histories and material are from the hospital. For scheduled hours see Pathology 401.

410. Medical Seminar. Electrocardiography. Fourth year, first trimester, 1 hour a week; 11 hours. *Dr. Brittingham.*

NEUROPSYCHIATRY

DR. H. M. CLECKLEY, *Professor*
DR. W. J. CRANSTON, *Clinical Professor*
DR. L. SCHEINMAN, *Assistant Clinical Professor*
DR. LANE H. ALLEN, *Associate*
JANE MEDLAR SHULER, *Assistant in Psychology*

101. PSYCHOBIOLOGY. A recitation and lecture course in which the common psychopathological process which underlie mental disorder are considered with especial reference to the personality as a whole. An effort is made to keep in view the general principles of normal psychobiological functioning and their close relation to morbid personality reactions. Each student is required to make a detailed and complete personality study of his own personality in the form of a written report. First year, 1 hour a week; 26 hours. *Dr. Cleckley.*

301. NEUROLOGY. A recitation and lecture course on organic diseases of the nervous system. Third year, 2 hours a week; 66 hours. See also Neurologic Surgery 301. *Dr. Cleckley.*

302. CLINICAL NEUROPSYCHIATRY. Practical instruction given to small groups in the out-patient department. History taking, neurological examination and psychiatric methods. Third year, ⅓ of class, 2 hours a week; 22 hours. Repeated each trimester. *Drs. Cleckley, Risteen* and *Resident Staff.*

401. NEUROLOGY. A lecture and demonstration course in disorders of the nervous system. Fourth year, 1 hour a week; 33 hours. *Dr. Cleckley.*

402. PSYCHIATRY. A lecture and recitation course outlining the more important mental diseases and the psychoneuroses, with clinical demonstrations and lectures by visiting psychiatrists. The class spends two days at the Georgia State Hospital for the Insane, at Milledgeville, studying cases and attending clinics under the direction of the staff. Fourth year, 1 hour a week; 33 hours. *Dr. Cleckley.*

403. PSYCHIATRIC CLINICS. Demonstrations and lectures presenting the more important psychoses. Fourth year, 18 hours. *Dr. Cleckley* and *Visiting Staff.*

TUBERCULOSIS

Dr. Lucius N. Todd, *Professor*

Specialized instruction in tuberculosis begins in the third trimester of the third year with a lecture course on the fundamentals of the disease. In the fourth year the work is entirely clinical. The facilities of a fifty bed tuberculosis hospital unit are available for teaching purposes, in addition to the material from an active diagnostic and pneumothorax clinic. Modern, approved methods of diagnosis and treatment, including surgical collapses, are stressed. Close affiliation with the newly created Department of Thoracic Surgery is maintained. An opportunity is afforded advanced students to become proficient in the administration of artificial pneumothorax; fluoroscopy; and instillation of iodized oil in the bronchial tree.

301. Tuberculosis Lectures. Third year, entire class, third trimester, 1 hour a week; 11 hours. *Dr. Todd.*

401 Tuberculosis Clinics. Fourth year, ⅓ of class, 3 hours a week; 33 hours. Repeated each trimester.*Drs. Todd, Major,* and *Medical Resident.*

402. Medico-Surgical Tuberculosis Conference. Fourth year, ⅓ of class, 1 hour a week; 11 hours. Repeated each trimester. *Drs. Todd and Major.*

403. Operative Clinics. Surgical procedures indicated in the treatment of tuberculosis pulmonary conditions are demonstrated. *Dr. Major.* For details see Department of Thoracic Surgery 403.

HISTORY OF MEDICINE

101. History of Medicine. This course consists of formal lectures on the history of the development of medicine in its broader aspects. Part of the course is devoted to the history of medicine as it developed in the colony and state of Georgia. *Drs. Kelly* and *Krafka.*

PEDIATRICS

DR. CLAUDE M. BURPEE, *Professor*
*DR. M. ROBINOW, *Associate Professor*
DR. ROBERT C. MCGAHEE, *Assistant Clinical Professor*
*DR. PHILIP A. MULHERIN, *Assistant Clinical Professor*
DR. HENRY P. HARRELL. *Clinical Associate*
DR. F. X. MULHERIN, Assistant Clinical Professor
DR. CLAUDE E. TESSIER, *Clinical Assistant*

A thorough understanding of what constitutes the normal baby and child is an esssential upon which the proper teaching of pediatrics should be based. Accordingly, instruction pertaining to the normal baby and child is stressed.

Preventive pediatrics is taught to students as the ideal of successful practice of pediatrics. With every ill child demonstrated in clinics, not only the pathological and clinical manifestations are considered, but also the preventive aspects of the case are emphasized.

Realizing that only by actual contact and proper study of sick children can the important diagnostic and therapeutic differences peculiar to this branch of medicine be mastered, the instruction throughout the fourth year is essentially practical.

301. During the first trimester in the third year the class is instructed on the development of the normal infant and child and physical diagnosis as applied to infants and children. Half of the time is spent in lectures and quizzes and the rest in actual examination of patients on the pediatric ward. Third year, first trimester, 2 hours a week, 22 hours. *Dr. Burpee* and *Staff.*

302. During the second trimester in the third year the class is instructed in infant feeding, nutritional disturbances and hygiene in infancy and childhood, and the more important diseases of infancy and childhood. Third year, second trimester, 2 hours a week, 22 hours. *Dr. Burpee.*

303. During the third trimester in the third year the study of the more important diseases of infancy and childhood, including the communicable diseases is continued. Third year, third trimester, 3 hours a week, 33 hours. *Dr. Burpee.*

304. WARD ROUNDS. The third year class is divided into three groups, each of which attends ward rounds twice weekly, for eleven weeks. Third year ⅓ of class, 2 hours a week, 22 hours. Repeated each trimester. *Dr. Burpee.*

**On leave in Armed Forces.*

401. Preventive Pediatrics. As a result of thorough organization and commendable cooperation between the Public Health Department, the Obstetrical Department, and the Pediatric Department, preventive pediatrics receives its proper consideration. The Public Health Department with its excellent corps of district nurses, social workers, and the follow-up system, keeps the well-baby clinic abundantly supplied with excellent teaching material. The Obstetrical Department turns over to the Pediatric Department all babies born in the hospital as soon as the cord is tied. Also in its out-patient obstetrical service the babies are referred to the well-baby clinic as soon as it is practical.

By such cooperation between the different departments, the students are able to give prenatal advice, deliver the mother, attend the newly born, and later take care of the baby during infancy in the well-baby clinic.

In this way the essentials of preventive pediatrics, such as maternal feeding, mixed feeding, artificial feeding, hygiene, immunization against diphtheria, typhoid and small-pox, are taught in a practical manner. Fourth-year students, in small groups, are required to attend. Fourth year, ⅓ of class, 1 hour a week, 11 hours. Repeated each trimester. *Dr. Burpee.*

402. Out-Patient Department. The students of the fourth-year class in small sections, are required to work daily for a period of six weeks in the pediatric out-patient department for sick babies and children. The yearly attendance of patients in this department is well over two thousand. The students are taught to take histories, diagnoses and treat the cases under the supervision of members of the pediatric staff. All varities of children's diseases are seen and treated in this department. Cases of special interest are sent to the hospital, and are used as clinical material before the entire class. Fourth year, 1/6 of class, ½ of trimester, 7½ hours a week, 41 hours. Repeated each trimester. *Dr. Burpee* and *Staff.*

403. Ward Work. During the fourth year the various acute and chronic diseases of infancy and childhood are taught in the pediatric wards of the University Hospital. Cases are assigned to students to be worked up, and these cases are used later in clinics given before the entire class. Material is quite sufficient to demonstrate practically all of the diseases of infancy and childhood. No didactic lectures are given; all the work is clinical throughout the fourth year. The student sees practically all pediatric cases going through the Univeristy Hospital. This gives the student oportunity to study diseases in the patient as well as in the textbooks. Fourth year, ⅓ of class for 11 weeks. *Dr. Burpee* and *Hospital Staff.*

404. Pediatric Clinics. Fourth year, 2 hours a week, 66 hours. *Drs. Burpee* and *McGahee.*

* 405. PEDIATRIC PSYCHIATRY. Behavior abnormalities in children. Fourth year, third trimester, 1 hour a week, 11 hours. *Dr. Cleckley.*

* 406. PEDIATRIC PSYCHIATRY CLINIC. Fourth year, 1 hour a week, 33 hours. *Dr. Cleckley.*

407. CLINICAL PATHOLOGICAL CONFERENCE. This is held in conjunction with the departments of Medicine, Pathology, and Surgery. For scheduled hours see PATHOLOGY 401.

**These courses will be combined with Dr. Cleckley's course in Psychiatry for the duration.*

SURGERY

*Dr. J. H. Sherman, *Professor*
Dr. G. F. Jones, Jr., *Associate Professor*
Dr. W. W. Battey, *Clinical Professor*
Dr. R. H. Chaney, *Clinical Professor*
Dr. R. L. Rhodes, *Clinical Professor*
*Dr. C. G. Henry, *Associate Professor*
Dr. G. W. Wright, *Associate Clinical Professor*
Dr. J. B. Bowen, *Assistant Professor*
Dr. C. D. Ward, *Assistant Clinical Professor*
*Dr. R. B. Weeks, *Assistant Clinical Professor*
*Dr. J. P. Hitchcock, *Clinical Assistant*
*Dr. J. E. Hummel, *Clinical Assistant*
*Dr. W. J. Williams, *Clinical Assistant*

Instruction in surgery is begun in the last trimester of the second year when an attempt is made to correlate the students' preclinic knowledge with the fundamentals of surgery. In the third year a balance is struck between didactic teaching and practical instruction in the out-patient department, hospital and laboratory. In the fourth year didactic teaching is minimized and emphasis placed on the intimate contact between student and patient, using the clinical materials in the hospital and out-patient department.

The courses in the sub-departments of surgery are listed separately.

201. Introduction To Surgery. The purpose of this course is to serve as a bridge between the knowledge gained in the preclinical courses and actual clinical cases. This is accomplished by a series of lectures, demonstrations and recitations. The student is also given instruction in the bedside examination of surgical patients. Emphasis is stressed on the fundamentals of surgery and the physical diagnosis of surgery. Second year, third trimester, 2 hours a week; 22 hours. *Dr. Bowen.*

301. Principles of Surgery. A lecture and recitation course in which, based on a standard text, the entire field of surgery is covered in a systematic fashion, emphasis being placed on diagnosis and treatment. Third year, first trimester, 1 hour a week; second and third trimesters, 2 hours a week; 55 hours. *Dr. Jones.*

302. Surgical Pathology. An attempt is made to correlate the second year course in pathology with clinical surgery. Pathological material removed at operations is examined and the student is taught to interpret the clinical course of the disease in the light of the pathological evidence. For scheduled hours see Experimental Medicine.

**On leave with Armed Forces.*

303. SURGICAL ANATOMY. A course in applied anatomy in which, by lectures, recitations and cadaver dissections, an endeavor is made to correlate the knowledge of anatomy previously gained with clinical surgery. Third year, second trimester, ½ of class, 2 hours a week; third trimester, ½ of class, 2 hours a week; 22 hours. *Dr. Bowen.*

304. SURGICAL TECHNIQUE. A practical course intended to teach the essential principles of surgical technique. The students, under constant supervision, perform standard operations on experimental animals observing strict aseptic precautions. All operations are done under ether anesthesia. The students aid in the pre-operative preparation of instruments and supplies. Third year, ⅓ of class, 6 hours a week; 66 hours. Repeated each trimester. See also ANESTHESIOLOGY 302. *Dr. Bowen.*

305-6. MINOR SURGERY AND MINOR OPERATIVE SURGERY. A course in diagnosis and treatment of ambulatory surgical cases given in the out-patient department. In consultation with the instructors the student examines and prescribes for the patients and does the required dressings.

Immediately following this clinic, the minor operative clinic is held. The students in small groups, have the opportunity to participate in the minor surgical procedures on patients in the out-patient department. This work is done in the operating rooms of the out-patient department. Third year, 1/6 of class, ½ trimester, 7 hours a week; 38½ hours. Repeated each trimester. *Drs. Jones, Bowen* and *Resident Staff.*

307. INTRODUCTION TO CLINICAL CLERKSHIP. 1/6 of the third-year class serve as clinical clerks on the surgical ward for ½ trimester. Approximately two patients are assigned to each student each week. Students are required to make routine histories, physical examinations and laboratory tests; to record their diagnosis and suggested therapy. They maintain a close contact with these patients until they are dismissed from the hospital. Each student reports one of his cases during this time. Third year, 1/6 of class, ½ trimester, 10 hours a week; 55 hours. *Drs. Jones and Bowen.*

308. DIAGNOSTIC CLINICS. During these periods the students report cases that were assigned to them on the surgical ward. The remainder of these periods are taken up by round table and bedside discussions of the patient with supplemented lecture by the instructors. Third year, ⅓ of class, 2 hours a week; 22 hours. Repeated each trimester, *Dr. Jones.*

401. SURGICAL CLINICS. Formal bedside clinics attended by the entire fourth-year class, in which selected cases are presented by the students to whom they have been assigned, followed by a general discussion of the case and a critical analysis of the diagnosis and treatment. Fourth year, 1 hour a week; 33 hours.*Drs. W. W. Battey, Chaney* and *Rhodes.*

402-3 Clinical Clerkships. One-third of the fourth-year class serve as clinical clerks on the surgical service for one trimester. All patients admitted to the public ward on this service are assigned in rotation to these students. They are required to make routine histories, physical examinations and laboratory tests; to record their diagnosis and suggested therapy. They maintain a close contact with the patient during his hospitalization and serve as operative assistants in operations on patients assigned to them. Daily ward rounds, with bedside discussions, are made. *Drs. Jones, Bowen* and *Resident Staff.*

404. Accident Room Service. In order to make the accident room material available for teaching purposes, each member of the fourth-year class is offered the opportunity of spending one week in attendance in the accident room, where he assists the Resident Staff in the treatment of these cases. The hospital provides special living quarters immediately adjacent to the accident rooms. Fourth year. Students assigned in rotation. *Resident and Visiting Staffs.*

405. Clinical Pathological Conference. See Pathology 401.

406. Surgical Research. The facilities of the experimental surgical laboratory and the public wards are available to any properly qualified individual who desires to carry on the investigation of a surgical problem. *Drs. Jones and Bowen.*

ANESTHESIOLOGY

DR. P. P. VOLPITTO, *Professor*

201. INTRODUCTION TO ANESTHESIOLOGY. Theories, stages and signs of anesthesia are taught, with a brief outline of the various agents employed. The course forms a part of course 202 in the department of Physiology and Pharmacology. Second year, second trimester, 4 hours. *Dr. Volpitto.*

301. PRINCIPLES OF ANESTHESIOLOGY. A course of lectures covering the principles of inhalation, regional, rectal and intravenous anesthesia, therapeutic block and gas therapy. Third year, first trimester, 1 hour a week; 11 hours. *Dr. Volpitto.*

302. PRACTICAL ANESTHESIOLOGY. A course given in conjunction with Surgery 304, Surgical Technique. Open drop ether is employed on experimental animals. Pre-medication, stages, signs and technique of adminstration of inhalation anesthesia and studied in a practical manner. The roles of oxygen and carbon dioxide in anesthesia are observied The recognition and treatment of shock, hemorrhage, drug overdosage and asphyxia are stressed. Third year, ⅓ of class, 4 hours a week; 44 hours. Repeated each trimester. *Dr. Volpitto.*

401. CLINICAL ANESTHESIOLOGY. Observation of actual anesthesia in the operating rooms. Students may be allowed to administer anestheesia under strict supervision. Pre and post-anesthesia ward rounds are made. This course is in conjunction with the clinical clerkship in Surgery. Fourth year. Students assigned in rotation, each receiving approximately one week's service. Computed 1 hour a week; 11 hours. *Dr. Volpitto.*

DERMATOLOGY AND ONCOLOGY

Dr. G. T. Bernard, *Clinical Professor*
Dr. James M. Flood, *Assistant Clinical Professor*
*Dr. Irvine Phinizy, *Assistant Clinical Professor*
Dr. W. H. Roberts, *Assistant Professor*
Dr. F. C. Hunter, *Clinical Instructor*
*Dr. R. M. Reifler, *Clinical Instructor*

301. Principles of Dermatology. A recitation and lecture course based on a standard textbook. Third year, 1 hour a week, first trimester, 11 hours. *Drs. Flood* and *Hunter.*

302. Clinical Dermatology. A course in practical instruction in the diagnosis and treatment of dermatological diseases, given in the out-patient department. Third year, 1/6 of class, ½ of trimester, 2 hours a week; 11 hours. Repeated twice each trimester. *The Staff.*

401. Cancer Clinic. Opportunity is offered students to observe the method of diagnosis, treatment and follow-up of cancer cases by attendance at the weekly cancer conferences at which patients are presented for group study and discussion. Fourth year, ⅓ of class, repeated each trimester, 1 hour a week; 11 hours. *Drs. Bernard, Roberts* and *Attending Staff.*

**On leave in Armed Forces.*

NEUROLOGIC SURGERY

DR. W. A. RISTEEN, *Professor*

201. NEUROLOGIC PHYSICAL DIAGNOSIS. Instruction and clinical demonstrations in the principles of neurologic diagnosis. Special emphasis is given to the physiologic and neurologic anatomy in relation to the diagnosis of diseases of the central nervous system. Second year, third trimester, 2 hours a week; 22 hours. *Dr. Risteen.*

301. NEUROLOGIC SURGERY. An endeavor to give the students an understanding of the prinicples employed in the diagnosis of neuro-surgical conditions and of the pathology involved. Special emphasis is also given to the care of cranial trauma. Third year, third trimester, 2 hours a week; 22 hours. Given in conjunction with Neurology 301. *Dr. Risteen.*

302. OUT-PATIENT CLINIC. The students participate in the examination and treatment of ambulatory patients. For scheduled hours see NEUROPSYCHIATRY 302.

401. CLINICAL NEURO-SURGERY. This course is given in conjunction with the course in clinical clerkship. By ward rounds and clinical conferences the students are given personal instruction in the diagnosis and treatment of neuro-surgical cases. Fourth year, ⅓ of class, 1 hour a week; 11 hours. Repeated each trimester. *Dr. Risteen.*

OPHTHALMOLOGY, OTO-LARYNGOLOGY AND ENDOSCOPY

Dr. C. I. Bryans, *Clinical Professor*
Dr. W. E. Matthews, *Associate Clinical Professor*
Dr. J. V. Roule, *Associate Clinical Professor*
*Dr. C. M. Kilpatrick, *Assistant Clinical Professor*

301. Principles of Ophthalmology and Oto-Larnygology. Instruction in these branches is given by means of didactic lectures, clinical lectures and demonstrations. Diseases of the organ of special sense are taught in a systematic way, special attention being paid to pathology and diagnosis. Third year, second and third trimesters, 16 hours. *Drs. Bryans, Kilpatrick, Matthews* and *Roule.*

401. Clinical Surgery. A course in which by means of ward rounds and operative clinics the surgical treatment of diseases of the eye, ear, nose and throat is presented. Fourth year ⅓ of class, 1 hour a week; 11 hours. Repeated each trimester. *The Staff.*

402. Clinical. A service in the out-patient department where practical training and diagnosis and treatment of the diseases of the eye, ear, nose and throat is given. Fourth year 1/6 of class, ½ trimester, 4½ hours a week; 24½ hours. Repeated twice each trimester. *The Staff.*

403. Esophagoscopy and Bronchoscopy. A course in which, utilizing patients in the hospital and out-patient department, the student is familiarized with the place which bronchoscopy and esophagoscopy occupy in diagnosis and treatment. Fourth year. Elective. *Dr. Matthews.*
**On leave in Armed Forces.*

ORTHOPEDIC SURGERY

DR. PETER B. WRIGHT, *Clinical Professor*
*DR. C. G. HENRY, *Associate Professor*

301. PRINCIPLES OF ORTHOPEDIC SURGERY. A systematic lecture and recitation course covering the general field of orthopedic surgery. Third year, first and second trimester; 17 hours. *Dr. Wright.*

401. CLINICAL ORTHOPEDIC SURGERY. A clinical period once a week. This time is devoted to operative clinics, ward demonstrations and informal lectures. Fourth year, ⅓ of class, 2 hours each week; 22 hours. Repeated each trimester. *Dr. Wright.*

402. CLINICAL OUT-PATIENT ORTHOPEDIC SURGERY. Under instructions of the Staff the student is taught diagnosis and treatment of ambulatory orthopedic conditions. Fourth year 1/6 of class, ½ of trimester 1½ hours a week; 8 hours. Repeated twice each trimester. *Dr. Wright.*

403. FRACTURES. A didactic and practical demonstration course. The student is quizzed on the principles of fractures and cases are shown to illustrate the underlying pathology. Fourth year, entire class, 1 hour a week, first and second trimesters; 22 hours. *Dr. Wright.*

404. FRACTURE CLINIC. A follow-up clinic for fractures. The usual methods of treatment are demonstrated and discussed. Fourth year, 1/6 of class ½ of trimester, 1½ hours a week; 8 hours. Repeated twice each trimester. *Dr. Wright.*

THORACIC SURGERY

Dr. Robert C. Major, *Professor*

The two chief aims of the instruction in thoracic surgery are preparation of the student to recognize and care for the emergencies arising from acutely disturbed intrathoracic physiology and familiarization of the student with the characteristics and available treatments of the various congenital, traumatic, infectious, and neoplastic lesions embraced by this relatively new field.

Tuberculous clinical material is derived from the Wilhenford Tuberculosis Unit of the University Hospital, Augusta, and the South Carolina Sanatorium, State Park, South Carolina. Non-tuberculous material is furnished by the wards of the University Hospital.

301. Principles of Thoracic Surgery. A lecture and recitation course illustrated with lantern slides and designed to continue and enlarge the course in Principles of Surgery (Surgery 301) as related to the thorax. Emphasis is placed upon intrathoracic physiology and mechanics and upon the diagnostic methods employed as well as upon a systematic survey of the surgical diseases of the chest. Third year, third trimester, 1 hour a week; 11 hours. *Dr. Major.*

401. Clinical Thoracic Surgery. See Surgery 402-3, Clinical Clerkships. Thoracic surgical patients are assigned to the fourth year group along with the general surgical patients admitted to the public wards. Clinical conferences are held with the individual student responsible for each case and wards rounds are held with the group as clinical material warrants. Students assist at operations upon patients assigned to them. *Dr. Major* and *Resident Staff.*

402. Medico-Surgical Tuberculosis Conference. A course designed to correlate the instruction in the natural history of tuberculosis with the indications for collapse therapy, types of collapse therapy available, choice of method of collapse in the individual case, and the application of collapse. Fourth year, ⅓ of class, 1 hour a week; 11 hours. Repeated each trimester. See Tuberculosis 402. *Drs. Todd* and *Major.*

403. Operative Clinics. Surgical procedures in both tuberculous and non-tuberculous cases are demonstrated on Friday morninigs throughout the year. The schedule of operations has to be consulted. *Dr. Major* and *Resident Staff.*

ROENTGENOLOGY

DR. L. P. HOLMES, *Clinical Professor*

401. ROENTGENOLOGY. Instruction is given in the underlying principles of X-Ray technique. The students are instructed in the roentgenological interpretation of a large number of practical cases, covering the field of roentgen diagnosis and a number of patients are shown under the fluoroscope, as a follow-up after the clinical diagnosis. Instruction is also given in the principles underlying roentgen therapy. Fourth year, entire class, 1 hour a week, second trimester; 11 hours. *Dr. Holmes.*

UROLOGY

DR. J. R. RINKER, *Professor*
DR. J. R. ROBERTSON, *Clinical Professor*
*DR. T. W. GOODWIN, *Assistant Clinical Professor*
*DR. J. Z. MCDANIEL, *Assistant Clinical Professor*

301. PRINCIPLES OF GENITO-URINARY SURGERY. A systematic lecture and recitation course is given to cover fundamental principles in the general field of genito-urinary surgery. Third year, 1 hour a week; 33 hours. *Dr. Rinker.*

401. CLINICAL GENITO-URINARY DISEASES. Practical training in the diagnosis and treatment of genito-urinary diseases including cystoscopy is given throughout the year in the out-patient department. Fourth year, 1/6 of class, ½ of trimester, 4½ hours a week; 24¾ hours. Repeated twice each trimester. *Dr. Rinker.*

402. WARD ROUNDS AND OPERATIVE CLINICS.. This course is devoted to the discussion of the diagnosis and treatment of genito-unrinary diseases and the demonstration of diagnostic procedures. The student has an opportunity to observe the removal of ureteral calculi by cystoscopic manipulation, litholapaxy under visualization, and the transuretheral removal of bladder neck obstruction by electro-resection. The out-patient department and the free wards supply ample material for this work. Fourth year, ⅓ of class, 1 hour each week; 11 hours. Repeated each tirmester.*Dr. Rinker.*

**On leave in Armed Forces.*

OBSTETRICS AND GYNECOLOGY

Dr. Richard Torpin, *Professor of Obstetrics and Gynecology*
Dr. Andrew J. Kilpatrick, *Professor of Clinical Obstetrics*
*Dr. E. A. Wilcox, *Professor of Clinical Gynecology*
Dr. John T. Persall, *Assistant Professor of Obstetrics and Gynecology*
Dr. J. W. Thurmond, *Associate Professor of Clinical Obstetrics*
Dr. M. P. Agee, *Assistant Professor of Clinical Gynecology*
Dr. Melvis O. Corbitt, *Clinical Assistant*
*Dr. F. N. H. Harrison, *Clinical Assistant*
Dr. A. Miller, *Clinical Assistant*
*Dr. C. M. Mulherin, *Clinical Assistant*
*Dr. A. K. Temples, *Clinical Assistant*
Dr. W. G. Watson, *Clinical Assistant*

The courses have been arranged to impart a fundamental knowledge of the anatomy, physiology and pathology, and of the principles of diagnosis and treatment in obstetrics and gynecology. Every effort is made to correlate the two branches.

Third year students in the main are given didactic instruction; while in the fourth year the student is afforded opportunity for further application in ward rounds, pathologic and operative clinics; also in out-patient clinics for gynecology, prenatal and postnatal care. In addition he attends more than thirty obstetric cases in the home, keeping written histories and making postpartum visits, besides attendance upon hospital cases.

301. Obstetrics. Lecture recitations and manikin demonstrations on the physiology of pregnancy and labor. Third year, 2 hours a week; 66 hours. *Dr. Torpin.*

301-a. Principles of Gynecology. A recitation and lecture course in the principles and practice of gynecology. Third year, 1 hour a week for the entire year; 33 hours. *Dr. Persall.*

302. Obstetrical Clerkship. During the third year each student is assigned from eight to ten cases for complete history, physical examination, and laboratory work, followed by attendance of the case while in the hospital, including assistance at delivery. The student records his observations of delivery and is quizzed about each case. *Drs. Torpin, Thurmond* and *Resident Obstetrician.*

303. Out-Patient Pre-Natal Clinic. Students in the third year class are divided into groups of six and are in attendance three afternoons per

**On leave in Armed Forces.*

week for five and one-half weeks. Practice is afforded in history taking, abdominal examination and ausculation, and pelvimetry. Many pathological conditions are found and discussed. Third year, 1/6 of class, ½ of trimester, 4½ hours a week; 25 hours. Repeated twice each trimester. *Drs. Torpin, Persall* and *Staff.*

305. MOTHER'S HEALTH CLINIC. This enables the student to become familiar with contraceptive methods as demonstrated in the out-patient department. Third year, groups of four. The clinic is held on Thursdays from 2:30-4:00 p.m. *Dr. Corbitt.*

401. LECTURES AND CLINICS ON PATHOLOGICAL OBSTETRICS. Ward cases in the hospital are used for this course. Fourth year, 1 hour a week; 33 hours. *Drs. Kilpatrisk, Torpin* and *Thurmond.*

402. HOME DELIVERY SERVICE. For this course the fourth-year class is divided into groups, each student being in attendance for thirty cases. The students alternate in delivering cases, being supervised for the first eight deliveries by one of the staff, and calling for consultation from the staff in all pathological conditions or complications. Case histories are prepared and submitted together with data for birth certificates on the cases attended. Entire twelve months. *Drs. Persall, Torpin* and Staff.

402-a. WARD ROUNDS. Presentation of gynecological conditions both pre- and post-operatively, together with ample opportunity for the student to examine the patients. Fourth year, ⅓ of class, 2 hours a week; 22 hours. Repeated each trimester. *Dr. Torpin.*

403. OPERATIVE OBSTETRICS. Throughout the year arrangements are made whereby students are allowed to attend certain major operations. *Visiting* and *Resident Hospital Staff.*

404. OPERATIVE GYNECOLOGY. This course allows the student to become familiar with the different operative procedures most common in gynecological surgery. One student is allowed to assist with each operation, the remainder of the group observing. Fourth year, ⅓ of class, 1 hour a week; 11 hours. Repeated each trimester. *Drs. Torpin* and *Agee.*

405. ADVANCED GYNECOLOGY. This course is designed to refresh the student's knowledge of the surgical pathology attendant upon gynecological and obstetrical conditions. The course includes demonstrations of gross pathology. Fourth year, 1 hour a week; 33 hours. *Dr. Torpin.*

406. CLINICAL GYNECOLOGY. Opportunity is afforded the student for diagnosis and treatment of ambulatory gynecological conditions seen in the out-patient department. This course includes one afternoon devoted to postoperative gynecologic clinic and to the granuloma clinic; also one afternoon in the gynecologic endocrine clinic. Fourth year, 1/6 of class ½ of trimester 7½ hours a week; 41 hours. Repeated each trimester. *Dr. Torpin* and *Staff.*

**EXPERIMENTAL MEDICINE

*Dr. Robert Greenblatt, *Professor*
Dr. H. S. Kupperman, *Research Fellow*
Mr. L. Q. Hair, *Research Assistant*

The department aims to cooperate with the other departments for the experimental and clinical investigation of problems in medicine. Facilities for laboratory endocrinology and animal experimentation are maintained. Particular stress is directed toward the investigation of the newer venereal diseases, experimental gynecology and endocrinology.

The following courses are given by its staff, in conjunction with the staffs of the departments of pathology, surgery, gynecology, and medicine.

301. Surgical Pathology. An attempt is made to correlate the second year course in pathology with surgery. Pathological material removed at operations is examined grossly and microscopically. Special stress is placed on fresh gross pathology. The student is taught to interpret the clinical course of a disease in the light of the pathological evidence. Third year, second and third trimesters, 1 hour a week; 22 hours. *Dr. Greenblatt.*

401. Granuloma Clinic. The students participate in the diagnosis and treatment of patients with chancroid, granuloma inguinale and lymphogranuloma venereum. Fourth year. See Obstetrics and Gynecology 406. *Dr. Greenblatt* and *Staff.*

402. Gynecologic Endcorine Clinic. A clinic for the study and treatment of gynecologic endocrine disorders in which the students assist in diagnosis and treatment. Fourth year. See Obstetrics and Gynecology 406. *Drs. Greenblatt, Kupperman and Mr. Hair.*

501. Special Gynecologic Pathology. A course by arrangement for the advanced graduate student intending to specialize in obstetrics and gynecology. One hour a week. *Dr. Greenblatt.*

**On leave in Armed Forces.*

***The conduct of the Department of Experimental Medicine has been suspended for the duration.*

GRADUATING CLASS, 1943

Name	Home Address	Internship, 1944
Adams, Charles David B. S., University of Georgia, 1940	Bloomingdale, Ga.	U. S. Naval Hospital Memphis, Tenn.
Arnold, Maurice Franklin, Jr. B. S., Mercer University, 1940	Macon, Ga.	Macon General Hospital Macon, Ga.
Bell, Arlis Green B. S., University of Georgia, 1941	Swainsboro, Ga.	University Hospital Augusta, Ga.
Bell, Jack Emory B. S., University of Georgia, 1941	Swainsboro, Ga.	University Hospital Augusta, Ga.

Seattle, Washington

Williams, John Weldon, Jr.....Hartwell, Ga.....University Hospital
A. B., Emory University, 1938 Augusta, Ga.

Williams, Virgil Brooks.....Savannah, Ga.....Crawford Long Hospital
B. S., University of Georgia, 1940 Atlanta, Ga.

ELECTIONS TO MEMBERSHIP IN ALPHA OMEGA ALPHA

Class of 1943

(April - December)

Elected during Third Year 1942-1943

James Walter Heath

Fenwick Tattnall Nichols, Jr.

Class of 1943

(April - December)

Elected during Fourth Year 1943

Billy Starr Hardman

James Bothwell Traylor

William Forrest Powell

Class of 1944

(January - September)

Elected during Third Year 1943

James Levi Duncan

John Willis Hurst

Robert Edgar Perry, Jr.

FOURTH YEAR CLASS, 1944

Anthony, Lynn Eastes ..... Macon, Ga.
A. B., Mercer University, 1936

Baldwin, Marion Augustus ..... Fort Gaines, Ga.

Bass, Eldred Christopher, Jr. ..... Carrollton, Ga.

Battey, Alfred Mann, Jr. ..... Augusta, Ga.
B. S., University of Georgia, 1942

Benson, Earl Bennette ..... Marietta, Ga.
B. S., The Citadel, 1940

Benton, Charles Crisp ..... Atlanta, Ga.
B. A., Emory University, 1941

Blumenthal, Irvin ..... Royston, Ga.
B. S., University of Georgia, 1942

Bramblett, Augustus Walter, Jr. ..... Forsyth, Ga.
A. B., Emory University, 1941

Bramblett, Rupert Harold ..... Cumming, Ga.
B. S., University of Georgia, 1942

Bridges, Henry Alford ..... Brinson, Ga.
B. S., Furman University, 1938

Brown, John Marion ..... Dillard, Ga.
A. B., Emory University, 1941

Brown, Robert Judson ..... Statesboro, Ga.
B. S., South Georgia Teachers College, 1941

Burdine, James Merrill ..... Marble Hill, Ga.
B. S., Union College, 1941

Case, Iverson Clark, Jr. ..... Atlanta, Ga.
A. B., Emory University, 1939

Colquitt, Hugh Stevens ..... Marietta, Ga.
B. S., University of Georgia, 1941

Davis, Charles Leslie ..... Macon, Ga.
A. B., Mercer University, 1941

Davis, Floyd Eugene ..... Patterson, Ga.
B. S., University of Georgia, 1941

Davis, Marvin LeRoy ..... Macon, Ga.

Dean, Harry Brooks ..... Macon, Ga.
A. B., Mercer University, 1941

Deen, Oliver Francis, Jr. ..... Douglas, Ga.
A. B., Emory University, 1940

Derrick, Howard Clifton, Jr. ..... Oglethorpe, Ga.
A. B., Mercer University, 1941

Duncan, James Levi ..... Bowdon Junction, Ga.
B. S., University of Georgia, 1942

DuPree, John Thomas ..... Gordon, Ga.

Ellis, John Oliver ..... Atlanta, Ga.
A. B., Emory University, 1941

Fisher, Albert, Jr. ..... Macon, Ga.
B. S., University of Georgia, 1942

Galloway, William Henry ..... Atlanta, Ga.
A. B., Emory University, 1940

Girtman, Louie Franklyn ..... Hazlehurst, Ga.
A. B., Emory University, 1941

Greer, Zack Evans ..... Cordele, Ga.
B. S., University of Georgia, 1941

Hames, Curtis Gordon ..... Claxton, Ga.
B. S., University of Georgia, 1941

Harper, Jack Thornton ..... Dewy Rose, Ga.
A. B., Emory University, 1940

Head, Douglas Lamar, Jr. ..... Zebulon, Ga.

Hopkins, Enon Chance ..... Waynesboro, Ga.
A. B., Emory University, 1941

Hurst, John Willis ..... Carrollton, Ga.
B. S., University of Georgia, 1941

Joel, Charles, Jr. ..... Athens, Ga.
B. S., University of Georgia, 1941

Joiner, Horace Greely ..... Butler, Ga.
B. S., University of Georgia, 1941

Lee, Howard Bailey ..... Atlanta, Ga.
A. B., Emory University, 1941

Lever, Joseph Eargle ..... Sandersville, Ga.

Lewis, William Earl ..... Macon, Ga.
A. B., Mercer University, 1941

Mann, David Samuel ..... Dawson, Ga.

Matthews, William Arthur ..... Augusta, Ga.
A. B., Emory University, 1936

McClelland, Warren Spence ..... Atlanta, Ga.
B. S., University of Georgia, 1941

McGuire, Thomas Howard ..... Augusta, Ga.
B. S., Tennessee State Teachers College, 1933

Middlebrooks, Tracy Williams ..... Macon, Ga.
A. B., Mercer University, 1941

Montgomery, Robert Clifford ..... Butler, Ga.
B. S., University of Georgia, 1941

Mulherin, Joseph Louis ..... Augusta, Ga.
B. S., University of Georgia, 1942

O'Neal, John Barnwell, III ..... Valdosta, Ga.
B. S., University of Georgia, 1941

Parrish, Lewis Holmes ..... Wrens, Ga.

Parrott, Jesse Lyle ..... Hahira, Ga.
B. S., University of Georgia, 1941

Patrick, Elwyn Vincent ..... Jackson, Ga.
A. B., Mercer University, 1939

Perry, Robert Edgar, Jr. ..... Savannah, Ga.

Petway, Allen Paul ..... Atlanta, Ga.
A. B., Emory University, 1941

Pound, William Emmett ..... Macon, Ga.
A. B., Mercer University, 1941

Robinson, Joe Sam ..... Rochelle, Ga.
B. S., University of Georgia, 1939

Sanders, Floyd Roscoe, Jr. ..... Decatur, Ga.
A. B., Emory University, 1941

Steele, William Thearle ..... Augusta, Ga.

Stevenson, Richard Hampton ..... Camilla, Ga.

Suttenfield, Virginia ..... Atlanta, Ga.
B. A., Agnes Scott, 1938

Turner, John Render ..... Gay, Ga.
B. S., University of Georgia, 1942

Wasden, Howell Anderson, Jr. ..... Midville, Ga.
A. B., Mercer University, 1936

White, William Otis ..... Augusta, Ga.
B. S., University of Georgia, 1940

THIRD YEAR CLASS, 1944

Adams, Harold Wilfred ..... Atlanta, Ga.
A. B., Emory University, 1942

Allen, Risden Tyler ..... Augusta, Ga.
B. S., University of Georgia, 1942

Attyah, Albert Mitchell ..... Americus, Ga.
B. S., University of Georgia, 1943

Bates, William Bowers, Jr. ..... Waycross, Ga.
B. S., University of Georgia, 1942

Bedingfield, James Andrew ..... Cadwell, Ga.
B. S., University of Georgia, 1941

Bell, Ira Eugene, Jr ..... Middleton, Ga.
B. S., Western Kentucky State Teachers College, 1942

Black, Grady Emmet ..... Valdosta, Ga.

Blair, Emil ..... Savannah, Ga.

Brackett, John Gordon ..... Augusta, Ga.
A. B., Oglethorpe University, 1942

Brewton, Cecil Bart ..... Mershon, Ga.
B. S. Pharm., University of Georgia, 1940

Brice, Mitchell ..... Quitman, Ga.
B. S., University of Georgia, 1941

Bruce, Charles Henley, Jr. ..... Augusta, Ga.
B. S., University of Georgia, 1941

Buckwald, Albert Irving ..... Stone Mountain, Ga.
A. B., Emory University, 1942

Burroughs, Gerald Winfred ..... Ocilla, Ga.
B. S., University of Georgia, 1942

Burroughs, William Franklin ..... Danielsville, Ga.
B. S., University of Georgia, 1942

Bush, Ovid Bern, Jr. ..... Atlanta, Ga.
B. S., University of Georgia, 1942

Carswell, Augustin Sturgis ..... Blakely, Ga.
B. S., South Georgia Teachers College, 1940

Claxton, Edward Burton, Jr. ..... Dublin, Ga.
B. S., University of Georgia, 1941

Cochran, Thomas Andrew ..... LaFayette, Ga.
B. S., University of Georgia, 1942

Collins, Louis Aloysius, Jr. ..... Augusta, Ga.

Cooley, Joe Bernard ..... Atlanta, Ga.
A. B., Emory University, 1942

Crumbley, James Jernigan, Jr. ..... Sylvester, Ga.
B. S., University of Georgia, 1941

Culver, James Fox ..... Macon, Ga.

Daniel, Benjamin Early ..... Claxton, Ga.
B. S. A., University of Georgia, 1940

Davis, Henry Gordon, Jr. ..... Sylvester, Ga
B. S., University of Georgia, 1941

Deas, Thomas Caperton ..... Augusta, Ga.
B. S., University of Georgia, 1942

Edmondson, Tom Leroy ..... Decatur, Ga.
A. B., Emory University, 1942

Faulkner, John Asa, Jr. ..... Griffin, Ga.
B. S., University of Georgia, 1942

Flowers, Eugene Monroe ..... Sylvester, Ga.
A. B., Vanderbilt University, 1940

Fry, Elmer Lee ..... Rabun Gap, Ga.

Gillman, Aron Nathan ..... Augusta, Ga.
B. S., University of Georgia, 1943

Goss, Christopher C. ..... Doerun, Ga.
A. B. Ed., University of Georgia, 1939

Graham, Frank Bartow, III ..... Decatur, Ga.
A. B., Mercer University, 1942

Hamilton, William Ferguson, Jr. ..... Augusta, Ga.
B. S., University of Georgia, 1942

Hardeman, Frank, Jr. ..... Louisville, Ga.
A. B., Emory University, 1941

Hicks, Wright Grant ..... Roberta, Ga.
B. S., University of Georgia, 1942

Hoffman, Frank ..... Savannah, Ga.
B. S., University of Georgia, 1943

Hogsette, Jerry Byron ..... Vienna, Ga.
B. A., University of Mississippi, 1942

Hughes, Charles Brock ..... Augusta, Ga.

Humphrey, Alva McClure ..... Waynesboro, Ga.
B. S., University of Georgia, 1943

Humphreys, William Floyd, Jr. ..... Sycamore, Ga.
B. S., University of Georgia, 1942

Ingram, William, Jr. ..... Decatur, Ga.

Jackson, Henry Calvin ..... Manchester, Ga.
B. S., University of Georgia, 1942

Jordan, Thomas Cook, Jr. ..... Bartow, Ga.
B. S., University of Georgia, 1942

Kelly, George Washington, Jr. ..... Carlton, Ga.
A. B., Emory University, 1941

Krafka, Joseph Franklin ..... Augusta, Ga.
A. B., University of Georgia, 1942

Lee, Walter Edward, Jr. ..... Waycross, Ga.
B. S., University of Georgia, 1943

Mason, Miles Herbert, Jr. ..... Lithonia, Ga.

McCollum, William ..... Thomasville, Ga.
B. S., University of Georgia, 1943

McCranie, Erasmus James ..... Milan, Ga.
A. B., Emory University, 1937
M. S., Emory University, 1938
Ph.D., University of Michigan, 1942

Meadows, John Cassius, Jr. ..... Athens, Ga.
B. S., University of Georgia, 1942

Mentzer, Dodge Dustin ..... Augusta, Ga.

Mims, William Bascom, Jr. ..... Columbus, Ga.

Nix, Dillard LaFayette ..... Commerce, Ga.
B. S. Pharm., University of Georgia, 1941

Osterhout, Gail Merrill ..... Sharpsburg, Ga.
B. S., University of Georgia, 1942

Polk, Rothwell Conway ..... Hapeville, Ga.
A. B., Emory University, 1942

Prescott, Eustace Harold, Jr. ..... Macon, Ga.
A. B., Mercer University, 1942

Pritchett, Thomas Leonard, Jr. ..... Winterville, Ga.
B. S., University of Georgia, 1942

Quattlebaum, Robert Bugg ..... Americus, Ga.

Rice, Robert Scott ..... Athens, Ga.

Rogers, Amory Audrey, Jr. ..... Commerce, Ga.
A. B., Emory University, 1942

Sams, William Christopher, Jr. ..... Dallas, Ga.
B. S., University of Georgia, 1940

Scott, Wilbur Moate ..... Milledgeville, Ga.
B. S., University of Georgia, 1942

Sims, Colquitt, Jr. ..... Commerce, Ga.
B. S., University of Georgia, 1943

Smith, Martha Lee ..... Washington, Ga.
B. S., University of Georgia, 1942

Smith, Ralph Benton ..... Atlanta, Ga.
A. B., Emory University, 1941

Thigpen, Corbett Hilsman ..... Macon, Ga.
A. B., Mercer University, 1942

Vance, Margaret ..... Fort Valley, Ga.
B. S., University of Georgia, 1943

Victor, Irving ..... Savannah, Ga.
B. S., University of Georgia, 1943

SECOND YEAR CLASS, 1944

Acevedo, Antonio Rafael ..... Decatur Ga.
B. S., University of Georgia, 1943

Andrews, Russell Edgar, Jr. ..... Rome, Ga.
B. S., University of the South, 1941

Ashford, Alexander Woodson ..... Athens, Ga.

Askew, William Arnold ..... Arlington, Ga.
B. S., University of Georgia, 1944

Battey, Louis LeGarde ..... Augusta, Ga.
B. S., Holy Cross College, 1943

Bennett, James William ..... LaGrange, Ga.

Bennett, William Fred, Jr. ..... LaGrange, Ga.
B. S., Mercer University, 1944

Bridges, William Lee, Jr. ..... Sumner, Ga.

Browning, Zack Clark ..... Cochran, Ga.
B. S., University of Georgia, 1938

Bryant, James Monroe, Jr. ..... Newnan, Ga.
A. B., Emory University, 1942

Campbell, Richard Porter ..... Rockmart, Ga.

Carrasco, Enrico Dederick ..... Newnan, Ga.
B. S., University of Georgia, 1943

Clay, Calder Benjamin, Jr. ..... Macon, Ga.

Conner, Herbert Ira ..... Mt. Vernon, Ga.
B. S., University of Georgia, 1943

Coolidge, Charles Walter ..... Savannah, Ga.

Cousins, William Luke, Jr. ..... Decatur, Ga.

Delancy, Herman ..... Cartersville, Ga.

DeLoach, Asa William ..... Savannah, Ga.

Foster, Henry Arthur ..... Franklin, Ga.
B. S., University of Georgia, 1944

Gibson, Wallace Miller ..... Milledgeville, Ga.
B. S., University of Georgia, 1944

Gower, William Justus, Jr. ..... Atlanta, Ga.
A. B., Emory University, 1943

Graf, Russell Enoch ..... Atlanta, Ga.

Green, Charles Russell ..... Dallas, Ga.
B. S., University of Georgia, 1943

Hackett, Laurier Eugene ..... Camilla, Ga.

Hair, Lawton Quinby, (Irregular) ..... Augusta, Ga.
B. S., University of South Carolina, 1939

Hall, Thomas Marshall ..... Milledgeville, Ga.
B. S., University of Georgia, 1943

Harrod, John Price, Jr. ..... Townsend, Ga.

Heaton, Samuel Arthur, Jr. ..... Augusta, Ga.

Hobbs, Armeanious Clement, Jr. ..... Columbus, Ga.

Hogan, Jasper Thomas, Jr. ..... Macon, Ga.

Holcomb, Paul Franklin ..... Clarksville, Ga.
A. B., Emory University, 1937

Isenberg, Sidney ..... Atlanta, Ga.
B. A., Washington and Lee University, 1942

Jackson, Thomas Fred ..... Atlanta, Ga.
A. B., Emory University, 1942

Jarrell, Floyd Chapel, Jr. ..... Butler, Ga.
B. S., University of Georgia, 1944

Jennings, William Dickerson, Jr. ..... Augusta, Ga.

Johnston, Marvin Harlan ..... Rome, Ga.

Kay, James Benjamin, Jr. ..... Byron, Ga.

Korst, Elizabeth ..... Decatur, Ga.
B. S., Florida State College for Women, 1938
M. S., Emory University, 1940

Kupperman, Herbert Spencer (Irregular) ..... Augusta, Ga.
B. A., University of Wisconsin, 1936
M. A., University of Wisconsin, 1937
Ph.D., University of Wisconsin, 1940

Lattimore, Thomas Jefferson, Jr. ..... Macon, Ga.
A. B., Mercer University, 1943

Martin, James Bledsoe ..... Shellman, Ga.
B. S., University of Georgia, 1944

Mauldin, John William ..... Dahlonega, Ga.
B. S., Presbyterian College, 1942

McArthur, Thomas Eric, Jr. ..... Macon, Ga.

McElreath, Farris Talmadge, Jr. ..... Wadley, Ga.

McMillan, Jesse Campbell ..... Macon, Ga.
A. B., Mercer University, 1932
B. S., Mercer University, 1944

McNeely, Henry Hyde ..... Toccoa, Ga.

McQuown, James Allen ..... Decatur, Ga.

Moore, Lewis William ..... Atlanta, Ga.

Morris, Jessie Miriam ..... Alpharetta, Ga.
B. S. Med., University of Georgia, 1943

Mulherin, Charles Stephen ..... Augusta, Ga.

Otto, Walter Wilson ..... Savannah, Ga.
B. S., University of Georgia, 1942

Peacock, Lamar Batts ..... Albany, Ga.
A. B., Emory University, 1941

Purkall, James Brennan, Jr. ..... Augusta, Ga.

Quillian, James O'Berry ..... Douglas, Ga.

Rentz, Turner Wayne ..... Colquitt, Ga.

Roberts, James Allen ..... Rockmart, Ga.

Sell, Mercer Brannon, Jr. ..... Dallas, Ga.

Shanks, Edgar DeWitt, Jr. ..... Atlanta, Ga.

Shuman, Warren Gilbert ..... Nashville, Ga.
B. S., University of Georgia, 1944

Sikes, Walter Allen ..... Augusta, Ga.

Sims, Frederick Eugene, Jr. ..... Atlanta, Ga.
A. B., Mercer University, 1941

Smith, Henry Wilder ..... Swainsboro, Ga.
B. S., University of Georgia, 1938

Smith, William Eugene ..... Pembroke, Ga.

Stephens, James Carlton ..... Sycamore, Ga.
B. S., Georgia Teachers College, 1943

Tanner, James Carlton, Jr. ..... Atlanta, Ga.

Taylor, Lois Anderson ..... Athens, Ga.
B. S., University of Georgia, 1943

Wall, Bithel ..... Sylvester, Ga.

Waller, Roy Malachi, Jr. ..... Dalton, Ga.
A. B., Emory University, 1943

Waters, Aubrey Jackson, (Irregular) ..... Augusta, Ga.
B. S., University of Georgia, 1932
M. S., University of Georgia, 1935
Ph.D., University of Wisconsin, 1940

Watson, Richard Patten, Jr. ..... Savannah, Ga.

Wayburn, Richard ..... Macon, Ga.
A. B., Mercer University, 1943

West, Edward McMichael ..... Atlanta, Ga.
A. B., Emory University, 1942

White, Benjamin Daniel ..... Atlanta, Ga.
A. B., Furman University, 1941

White, Cecil Asa, Jr. ..... Waycross, Ga.
A. B., Emory University, 1943

Whitely, Seals Leftwich, Jr. ..... Cedartown, Ga.
B. A., Emory University, 1942

Wong, Margaret ..... Augusta, Ga.
B. S., Mercer University, 1944

FIRST YEAR CLASS, 1944

Addy, William Harrison, Jr. ..... Senoia, Ga.

Agostas, William Nick ..... Augusta, Ga.

Bailey, Charles Denny ..... LaGrange, Ga.

Bodziner, Lawrence Stanley ..... Savannah, Ga.

Brawley, William Gaston ..... Decatur, Ga.

Brown, Fred Wilson ..... Augusta, Ga.

Brown, Robert Harris, Jr. ..... Locust Grove, Ga.
A. B., Emory University, 1940

Burns, John Knox, Jr. ..... Gainesville, Ga.

Carson, Harold Bryan ..... Dalton, Ga.
B. S., University of Georgia, 1944

Carson, Willard Palmer ..... Dalton, Ga.

Carver, Joseph Rodwell ..... Augusta, Ga.
A. B., Emory University, 1940

Caswell, Doyle Fuller ..... Atlanta, Ga.
A. B. Ed., University of Georgia, 1938
M. A. University of Georgia, 1939

Coffee, John Young, Jr. ..... Athens, Ga.
B. S. Pharm., University of Georgia, 1943

Coleman, Otha Kinney ..... Unadilla, Ga.
B. S. Pharm., University of Georgia, 1943

Counts, Russell Lane ..... Dalton, Ga.

Crumbley, Arthur Jack, Jr. ..... Atlanta, Ga.

Dixon, Ellis Howard, Jr. ..... Athens, Ga.

Dodd, William Asa ..... Macon, Ga.

Doulis, Paul Polichron ..... Hopewell, Va.

Dozier, Thomas Calbeck ..... Atlanta, Ga.
B. C. S., University System of Georgia Evening College, 1943

Elam, Lincoln Patrick, Jr., ... Lincolnton, Ga.
Etheridge, Edwin Holt ..... Carl, Ga.
Forester, Beverly Wood ..... Cairo, Ga.
Gaines, Frances Clarke (Irregular) ..... Macon, Ga.
A. B., Wesleyan University, 1939
M. S., Emory University, 1942
Gilmore, George Mathis ..... Milledgeville, Ga.
Glover, Odis Greer, Jr. ..... Canton, Ga.
Goldin, Harold Winfred ..... Rcokmart, Ga.
Goss, Woodrow ..... Richland, Ga.
Greene, John Harold ..... Hephzibah, Ga.
Griffith, Daniel Plunkett ..... Sandy Springs, Ga.
B. S. University of Georgia, 1944
Hamilton, Walton Winslow ..... Augusta, Ga.
B. S., University of Georgia, 1943
Hargrove, Roy Belmont, Jr. ..... Waynesboro, Ga.
Harvey, James DeLoach ..... Glennville, Ga.
Haston, Hugh Brady, Jr. ..... Albany, Ga.
Hearn, Henry Branham, Jr. ..... Griffith, Ga.
Hirsch, Jack Walter ..... Columbus, Ga.
Hockenbull, John Andoe ..... Atlanta, Ga.
A. B. Emory University, 1940
Hodges, John McCormick, Sr. ..... Marietta, Ga.
B. S. Pharm., Philadelphia College of
Pharmacy and Science, 1936
M. S. Pharm., Philadelphia College of
Pharmacy and Science, 1937
Holbrook, Howell Parks, Jr. ..... Commerce, Ga.
Houston, William Herbert, Jr. ..... Swainsboro, Ga.
Jones, Charles Marks, Jr. ..... Albany, Ga.
Jones, James Richard, Jr. ..... Hawkinsville, Ga.
Jones, Paul Mathews ..... Middleton, Ga.
B. S. Pharm., University of Georgia, 1941
Kestler, May Agnes ..... Atlanta, Ga.
King, Hubert Ulysses ..... Augusta, Ga.
Lane, George Mitchell ..... Lincolnton, Ga.
May, Louis Earl ..... East Lansing, Mich.
McArthur, John Davis ..... Vidalia, Ga.
A. B. Emory University, 1943

McNeill, Archibald Alexander, Jr. ..... Cario, Ga.
A. B., Davidson College, 1943
Meeks, Calvin Stewart, Jr. ..... Nicholls, Ga.
B. S., University of Georgia, 1943
Moore, Henry McIntosh, Jr. ..... Thomasville, Ga.
A. B., Emory University, 1943
Nathan, Marvin Myer ..... Ocilla, Ga.
Neal, Lum Geoffrey, Jr. ..... Cleveland, Ga.
Nicolson, William Perrin, III ..... Atlanta, Ga.
Norton, John Harvey, Jr. ..... Cave Spring, Ga.
Oesterreicher, Donald Lawson ..... Quitman, Ga.
Parker, Charles Orville, Jr. ..... Waycross, Ga.
B. S., University of Georgia, 1944
Priles, Charles Victor ..... Atlanta, Ga.
A. B., Emory University, 1940
Pryor, Carol Graham ..... Oliver, Ga.
B. A., Georgia State College for Women, 1939
Reese, Haldene Eugene ..... Jakin, Ga.
Reinhardt, Roger Franklin ..... Ashburn, Ga.
Richards, Charles Kenneth ..... Greensboro, Ga.
Roberts, Ralph Donald ..... Gray, Ga.
Sims, John Norris ..... Comer, Ga.
B. S. Pharm., University of Georgia, 1938
Smith, Joel Perry ..... LaGrange, Ga.
Starr, Harlan McKinney ..... Rome, Ga.
Steinbach, Richard Allen ..... Atlanta, Ga.
Stewart, Marcus Greene ..... Gray, Ga.
Taylor, William Johnston ..... Davisboro, Ga.
B. S. Pharm., University of Georgia, 1942
Vincenzi, Rosina ..... Rome, Ga.
Wagar, Anne Wilkinson ..... Atlanta, Ga.
B. A., Vanderbilt University, 1943
Ward, Roy Thurman, Jr. ..... Watkinsville, Ga.
B. S., University of Georgia, 1943
Weatherwax, Fuller Garner ..... Augusta, Ga.
Williams, Pierce Lee, Jr. ..... Cordele, Ga.
Wills, Benjamin Charles ..... Savannah, Ga.
Wills, Charles Edward, Jr. ..... Washington, Ga.
Wilson, John Page ..... LaGrange, Ga.
Winter, Wallace Edwards ..... Augusta, Ga.

SUMMARY OF REGISTRATION

1944

Fourth Year Class	60
Third Year Class	69
Second Year Class	73
First Year Class	77
Irregular	4
Total Registration	283

FIRST YEAR 1944

FIRST QUARTER, January 6-March 22, 1944

	Monday	*Tuesday*	*Wednesday*	*Thursday*	*Friday*	*Saturday*
9-10	Public Health	GROSS ANATOMY				
10-11						
11-12						
12-1						Clinical Anatomical Conference*
2-3	HISTOLOGY					
3-4						
4-5					Library Conference	

*Beginning February 26, 1944 — Psychobiology, 12-1 Saturdays.
NOTE: Military — Friday, 8-9 A. M. and Saturday 1-2 P. M.

FIRST YEAR, 1944

SECOND QUARTER, March 27-June 10, 1944

	Monday	*Tuesday*	*Wednesday*	*Thursday*	*Friday*	*Saturday*
9-10	GROSS ANATOMY					Embryology
10-11						
11-12						
12-1						Psycho-biology
2-3	Chemistry	Embryology	Chemistry	Embryology	Chemistry	
3-4						
4-5						

Military — Friday, 8-9 A. M. and Saturday, 1-2 P. M.

FIRST YEAR, 1944

THIRD QUARTER, June 19-September 2, 1944
